Blum Clip Top - Door Hinge Blumotion - Inset - Nickel

Variant code: 973A0700

Blum Clip Top - Door Hinge Blumotion - Inset is designed to add integrated soft-close functionality to compatible Blum CLIP top hinges used on inset cabinet doors. Manufactured by **Blum**, a globally recognised specialist in precision cabinet hardware, this component enhances cabinet usability by providing controlled and quiet door closing while maintaining the reliability and adjustability associated with the CLIP top hinge system.

The BLUMOTION unit clips directly onto the hinge arm of compatible **Blum CLIP top hinges**, allowing inset cabinet doors to close smoothly and gently. During the final stage of closing, the integrated damping mechanism slows the door movement to prevent impact against the cabinet frame, helping protect both the cabinet structure and door edges from repeated stress. This controlled motion improves everyday cabinet operation and contributes to the long-term durability of furniture installations.

Designed specifically for **inset cabinet door configurations**, the unit integrates neatly with the hinge without affecting hinge alignment or adjustment capability. The compact clip-on design allows for straightforward installation, making it suitable for both new cabinet installations and upgrades where soft-close functionality is required without replacing existing hinges.

Manufactured from durable engineered materials with a **nickel-toned finish**, the component blends discreetly with hinge hardware and delivers reliable performance within Blum hinge systems used across modern cabinetry.

Product Features

- Clip-on **BLUMOTION soft-close mechanism** for CLIP top hinges
- Compatible with **inset cabinet door applications**
- Designed for use with **Blum CLIP top hinge systems**
- Provides **controlled and quiet door closing**

- Compact component integrates within hinge arm assembly
- Durable construction with **nickel-toned finish**

Product Benefits

- Upgrades existing hinges with **soft-close functionality**
- Reduces door impact and protects cabinet structures
- Improves cabinet usability and everyday comfort
- Maintains full hinge adjustment capability
- Allows simple installation without replacing hinges
- Suitable for residential and light commercial cabinetry

Technical Characteristics

- Compatible with **Blum CLIP top hinge systems**
- Designed for **inset cabinet door configurations**
- **Clip-on installation** directly onto hinge arm
- Integrated **BLUMOTION damping mechanism**
- Engineered for reliable long-term hinge performance
- Designed for integration within **Blum cabinet hardware systems**

Applications

This component is intended for **cabinet doors fitted with Blum CLIP top hinges** where controlled soft-close performance is required for inset door installations. It is commonly used in kitchens, wardrobes and fitted furniture where doors sit flush within the cabinet frame. By adding BLUMOTION damping to compatible hinges, it improves closing comfort, reduces noise and helps extend the service life of cabinet components.
