Blum Clip Top Mounting Plate - Cruciform Cam Expando - Nickel - 3mm

Variant code: 174H7130E

Blum Clip Top Mounting Plate - Cruciform Cam Expando - Nickel is engineered to provide secure and accurately positioned hinge fixing within the Blum CLIP top system. Designed for seamless integration with compatible CLIP top hinges, this mounting plate ensures stable attachment and precise door alignment across a wide range of cabinet constructions. Manufactured from durable steel with a protective nickel-plated finish, it delivers dependable long-term performance in residential and light commercial cabinetry.

The cruciform cam design enables efficient height adjustment during installation, allowing fine tuning of door positioning to achieve consistent gaps and smooth operation. Featuring the EXPANDO fixing system, the plate is designed for secure anchoring into prepared cabinet side drilling. The EXPANDO mechanism expands within the panel to provide strong retention, supporting reliable hinge performance across various cabinet materials.

The 3mm height configuration introduces the required offset between the cabinet side and hinge arm, forming part of the overall overlay calculation. When paired with the correct hinge and cabinet construction, this ensures accurate door projection and consistent alignment within the Blum hinge system.

Product Features

Designed for Blum CLIP top hinge systems

Cruciform cam mounting plate design

Integrated EXPANDO fixing system

3mm height configuration

Durable nickel-plated steel finish

Compatible with tool-free CLIP top hinge attachment

Engineered for secure cabinet side fixing

Adjustable for precise door alignment

Product Benefits

Ensures stable and secure hinge mounting

Allows efficient height adjustment via cam mechanism

Provides strong retention with EXPANDO anchoring

Supports accurate door positioning and consistent reveals

Suitable for professional installation and production environments

Maintains long-term structural reliability

Technical Characteristics

3mm plate height determines final hinge positioning

EXPANDO fixing requires correctly prepared cabinet side drilling

Adjustable cam mechanism for fine height correction

Designed for use with compatible Blum CLIP top hinges

Steel construction with protective nickel finish

Correct hinge and plate pairing ensures optimal door performance

Applications

This mounting plate is intended for cabinet installations requiring a 3mm hinge offset within the Blum CLIP top system. It is commonly specified in overlay cabinet constructions where precise door projection and alignment are essential. Suitable for kitchens, bedrooms, storage units and bespoke fitted furniture, the EXPANDO fixing method makes it particularly appropriate for installations requiring secure anchoring and consistent performance in both residential and light commercial environments.
