Blum Clip Top Hinge - Boss Spacer for 107°, 110°, 155° Blumotion Profile - Screw-on

Variant code: 70T3507.21

Blum CLIP top Hinge - Boss Spacer for 107°, 110°, 155° BLUMOTION Profile - Screw-on is designed to support correct hinge installation when using Blum CLIP top hinges with BLUMOTION profiles. Manufactured by **Blum**, a global leader in precision cabinet hardware, this boss spacer assists with accurate hinge positioning and secure fixing, ensuring consistent hinge performance and reliable door operation.

Engineered specifically for **Blum CLIP top hinges with 107°, 110° and 155° opening angles**, the spacer allows the hinge cup fixing screws to seat correctly when installing hinges on profiled or framed cabinet doors. By providing the required offset, the spacer ensures proper screw engagement while maintaining stable hinge installation and correct hinge geometry.

Designed for **screw-on hinge boss fixing**, the spacer installs between the hinge cup and the cabinet door surface, helping to distribute fixing pressure and support secure attachment within the door material. Its compact design integrates neatly with the hinge cup, maintaining the hinge's full adjustment capability and compatibility within the Blum hinge system.

Manufactured from durable materials and engineered to Blum's precision standards, the spacer ensures reliable performance and long-term durability when used with compatible CLIP top hinge systems.

Product Features

• Boss spacer designed for **Blum CLIP top hinge systems**
• Compatible with **107°, 110° and 155° BLUMOTION profile hinges**
• Designed for **screw-on hinge fixing**
• Supports correct hinge cup installation on profiled cabinet doors
• Compact design integrates with hinge cup fixing points

Product Benefits

Tel: 01626 333900
Email: info@swshardware.com

• Ensures accurate hinge installation on profiled or framed cabinet doors
• Supports secure hinge fixing within door material
• Maintains reliable hinge performance and alignment
• Allows proper screw engagement in specialised door constructions
• Compatible with Blum CLIP top hinge systems

Technical Characteristics

• Compatible with **Blum CLIP top hinges with BLUMOTION profiles**
• Suitable for **107°, 110° and 155° opening angle hinges**
• Designed for **screw-on hinge boss fixing**
• Installs between hinge cup and door surface
• Engineered for integration within Blum cabinet hardware systems

Applications

This boss spacer is intended for **cabinet doors with profiled or framed designs** where standard hinge cup installation requires additional spacing. It is commonly used with **Blum CLIP top hinges with 107°, 110° and 155° opening angles**, ensuring secure screw-on hinge fixing and maintaining smooth hinge operation in kitchens, fitted furniture and custom cabinetry projects.
