Blum Clip Top - 100° Opening Angle Stop for 155° Wide Angle Hinge

Variant code: 70T7553

Blum Clip Top - 110° Opening Angle Stop for 155° Wide Angle Hinge is designed to limit the opening range of compatible Blum CLIP top 155° wide-angle hinges. Manufactured by **Blum**, a globally recognised specialist in precision cabinet hardware, this accessory helps control door movement where a full hinge opening may cause interference with adjacent cabinets, walls or internal fittings.

The restrictor inserts directly into the hinge mechanism, reducing the maximum opening angle of the hinge from **155° to approximately 110°**. By limiting the door travel, it helps prevent cabinet doors from striking neighbouring cabinetry, pull-out systems or interior fittings while maintaining smooth hinge operation.

Designed specifically for use with **Blum CLIP top 155° wide-angle hinges**, the restrictor integrates seamlessly into the hinge assembly without affecting hinge alignment or adjustment. The compact design allows quick installation during hinge assembly or retrofitting to existing hinges where controlled door movement is required.

Manufactured from durable engineered material with a discreet finish, the restrictor maintains the reliability and long-term performance expected from Blum cabinet hardware systems.

Product Features

- Opening angle restrictor for **Blum CLIP top 155° hinges**
- Limits hinge opening from **155° to approximately 110°**
- Designed to integrate within the hinge mechanism
- Compact insert for simple installation
- Durable engineered construction
- Maintains compatibility with Blum CLIP top hinge systems

Product Benefits

- Prevents cabinet doors from over-

opening
- Protects adjacent cabinets, walls and internal fittings
- Improves control of door movement
- Maintains smooth hinge performance
- Allows easy retrofit to existing hinge installations
- Supports long-term durability of cabinet components

Technical Characteristics

- Compatible with **Blum CLIP top 155° wide-angle hinges**
- Restricts opening angle to approximately **110°**
- Designed as an insert within the hinge mechanism
- Does not affect hinge adjustment capability
- Engineered for integration within Blum cabinet hardware systems

Applications

This restrictor is used in cabinetry where **Blum CLIP top 155° wide-angle hinges** are installed but full door opening must be limited. It is commonly specified in kitchens, wardrobes and fitted furniture where nearby cabinets, appliances or pull-out systems require controlled door movement. By restricting the hinge opening angle, it helps protect surrounding components while maintaining smooth and reliable hinge performance.

Property	Value
