

Blum Modul Clip Top Cover Cap – Straight Hinge Arm – Nickel

Variant code: 90M2503

Blum MODUL Cover Cap – Straight Hinge Arm – Nickel is designed to provide a clean and professional finish to cabinet hinge installations by concealing the visible hinge arm on compatible **Blum MODUL hinges**. Manufactured by **Blum**, a globally recognised specialist in cabinet hardware, this cover cap enhances the internal appearance of cabinetry while maintaining full compatibility with the **MODUL hinge system** used across a wide range of cabinet constructions.

The cover cap fits securely over the **straight hinge arm**, neatly covering exposed hinge components to create a streamlined cabinet interior. By concealing the hinge arm structure, it improves the overall presentation of cabinet hardware and contributes to a more refined internal cabinet finish, particularly in installations where hinge components remain visible when the cabinet door is open.

Designed for efficient installation, the cap **clips directly onto the hinge arm** without the need for additional tools or fixings. This enables installers to complete hinge installations quickly while still maintaining access to hinge components when adjustments or servicing are required. As part of the **Blum MODUL hinge system**, the cover cap integrates seamlessly with compatible hinges to support consistent and professional cabinet hardware installations.

Finished in **Nickel**, the cover cap coordinates with standard nickel-plated hinge hardware to maintain a consistent and professional cabinet interior appearance. The product is available in **Plain and Printed with Blum variations**, allowing manufacturers and installers to select the preferred finish while maintaining full compatibility with the hinge system. Manufactured from durable materials, the cover cap is designed to withstand everyday cabinet use while maintaining its appearance.

Product Features

- Designed for **Blum MODUL straight hinge**

arms

- Conceals the **hinge arm mechanism** for a clean cabinet interior
- **Clip-on installation** for quick and simple fitting
- Compatible with the **Blum MODUL hinge system**

- Available variants: **Plain and Printed with Blum**

Product Benefits

- Improves the **appearance of cabinet interiors**
- Creates a **clean and professional hinge installation**
- Enables quick installation without additional tools
- Maintains access to hinge adjustments and servicing
- Coordinates with **nickel hinge hardware**
- Enhances the overall presentation of cabinet fittings

Technical Characteristics

- Designed for **MODUL straight hinge arm cover applications**
- **Clip-on mounting design** for straightforward installation
- Compatible with **Blum MODUL hinge systems**
- **Nickel finish** to match standard hinge hardware
- Available variants: **Plain and Printed with Blum**
- Durable construction suitable for cabinet

interiors

Applications

This cover cap is used to complete **Blum MODUL hinge installations** in kitchens, wardrobes, storage cabinets and fitted furniture where a clean and professional cabinet interior is required. By covering the hinge arm mechanism, it improves the internal appearance of cabinet hardware while maintaining full hinge functionality. It is commonly specified in **residential and commercial joinery projects**, including kitchens, bedroom furniture and office storage systems where coordinated cabinet hardware and refined finishing details are important.
