Concealed Overhead Door Closer inc Single Action Arm Size 2-4 - Antique Brass

Variant code: 2840.01.AB

Concealed Overhead Door Closer with Single Action Arm is a **high-performance cam action door closer** designed to provide smooth, controlled door closing while remaining completely hidden when the door is closed. Available in a choice of architectural finishes, this **EN Size 2-4 power-adjustable** closer combines accessibility, fire safety and discreet aesthetics, making it ideal for premium commercial, healthcare, education and public buildings.

Featuring an advanced **cam and roller mechanism**, the closer significantly reduces opening forces to help doors comply with **Approved Document M** and **BS 8300** accessibility recommendations. Its ultra-slim **32mm-wide mechanism**, including the intumescent kit, allows installation into **44mm FD30 timber doors** without visible shadowing ("ghosting"), preserving the appearance and structural integrity of the door.

Designed for maximum versatility, the closer is **un-handed**, adjustable from **EN Power Size 2-4**, and suitable for a wide range of **timber and metal doors** weighing up to **80kg** and **1100mm wide**. Successfully tested to **BS EN1154**, **CE Marked**, **Certifire Approved**, and fire tested to **EN1634-1**, it is suitable for both **fire and smoke doors**. Unlike many concealed slide arm closers, it achieves smoke certification without additional smoke fins, allowing the exposed connector bar to coordinate perfectly with surrounding door furniture.

The engineered **power latch closing** mechanism ensures positive, reliable latching, even where air movement from draughts or air conditioning may affect conventional cam action closers. Backed by a **35-year guarantee**, this concealed closer delivers dependable long-term performance for demanding commercial installations.

Product Features

- **Fully concealed overhead cam action door closer**
- **Single action arm included**
