Cylinder Pull Euro Profile - Satin Stainless Steel

Variant code: 1420.03.SSS

The **Euro Profile Cylinder Pull** is a high-quality door accessory designed to assist in pulling doors closed while protecting the Euro profile cylinder from unnecessary wear. Manufactured from durable stainless steel with a contemporary **Satin Stainless Steel (SSS)** finish, it offers a clean, professional appearance that complements modern architectural door hardware in both commercial and residential environments.

Designed for compatibility with standard **Euro profile cylinders**, the cylinder pull provides a convenient gripping point for opening and closing doors without placing excessive force on the key or cylinder. Its corrosion-resistant stainless steel construction ensures long-lasting performance, making it suitable for frequent use in high-traffic areas while maintaining its attractive satin finish.

Ideal for new installations, refurbishment projects and replacement hardware, the Euro Profile Cylinder Pull delivers a practical and stylish solution for improving door operation while enhancing the overall appearance of entrance and access doors.

Product Features

- Euro profile cylinder pull
- Manufactured from stainless steel
- Satin Stainless Steel (SSS) finish
- Designed for use with standard Euro profile cylinders
- Provides a dedicated grip for pulling doors closed
- Corrosion-resistant construction
- Suitable for commercial and residential applications
