

Dart Interconnecting Lead for 12V Flexible Tape with KüKlip Connectors – 50mm

Variant code: LFK12050

Tape can be trimmed every 50mm. Up to 8 Metres can be run off one input lead. Each length of tape comes with KüKlip connectors on each end for push fit connecting the input lead and subsequent lengths of tape to get your desired size. Both ends of the tape can be used by using the adapter that comes with the input lead as standard. Self Adhesive using 3M. Tape is silicon covered which protects the diodes and makes cleaning easy.
