Din Lift to Lock Bathroom Lock 72mm c/c, 60mm b/s - Satin Stainless Steel - Square Forends

Variant code: 2405.07.SSS

The **DIN Lift to Lock Bathroom Lock** is a premium mortice bathroom lock designed to provide secure privacy locking for modern washrooms and sanitary facilities. Featuring **72mm centres** and a **60mm backset**, this lock is specifically designed for use with lift-to-lock lever handle furniture, delivering smooth operation and dependable performance in both residential and commercial environments. Finished with a durable **Satin Stainless Steel (SSS)** forend, it complements contemporary architectural door hardware.

Manufactured for long-lasting reliability, the lock is engineered to DIN standards and is suitable for use with compatible lift-to-lock bathroom handles and privacy turn mechanisms. Its precision-engineered internal mechanism provides smooth locking and unlocking action, while the robust construction makes it ideal for high-frequency use in hotels, healthcare facilities, offices and residential properties.

Suitable for new-build projects, commercial fit-outs and refurbishment work, the DIN Lift to Lock Bathroom Lock provides a reliable and professional privacy locking solution that combines durability, ease of operation and contemporary styling.
