

Domus Line MAGY Power Cable – 1m – Black

Variant code: F0001000013

The **Domus Line MAGY Magnetic Power Cable** is the dedicated power connection accessory for the **MAGY electrified track lighting system**. Measuring **1000mm (1m)** long, the cable provides the electrical connection between the MAGY electrified guide and a compatible **24VDC power supply**.

The power cable features a **magnetic head with micro contacts**, providing a reliable electrical connection with the electrified guide integrated into the MAGY track. At the power supply end, a **Micro24 male connector** enables connection to a compatible 24VDC power supply unit.

As part of the modular MAGY system, the power cable benefits from the system's **reverse polarity protection**, allowing it to connect to the electrified track in either orientation without polarity constraints. To maintain the system's maximum capacity of **3A / 72W** and help avoid voltage drops, Domus Line specifies a maximum track length of **4000mm per power cable**.

Product Features

- **Dedicated power cable for the MAGY electrified track system**
 - Measures **1000mm (1m)** in length
 - Features a **magnetic connection head**
 - Integrated **micro contacts** provide electrical connection with the electrified guide
 - Features a **Micro24 male connector**
 - Designed for connection to a compatible **24VDC power supply unit**
 - Benefits from the MAGY system's **reverse polarity protection**
 - Can connect to the track in **either orientation**
 - Supports a maximum system current of **3A**
 - Supports a maximum system power of **72W**
 - Maximum track length of **4000mm per power cable**
-

Product Benefits

- **Magnetic connection provides a quick and convenient method of supplying power to the MAGY electrified track**
- **Reverse polarity protection allows the cable to connect in either orientation without polarity constraints**
- **Micro24 male connector provides dedicated connection to a compatible 24VDC power supply**
- **Magnetic head and micro contacts provide a reliable electrical connection with the electrified guide**
- **1m cable length** provides practical routing between the MAGY track and power supply
- Supports MAGY installations with track lengths of up to **4000mm per power cable**

Technical Characteristics

- **Product Type:** Magnetic Power Cable
- **System:** MAGY
- **Cable Length:** 1000mm / 1m
- **Track Connection:** Magnetic Head with Micro Contacts
- **Power Supply Connector:** Micro24 Male
- **Power Supply Voltage:** 24VDC
- **Maximum Current:** 3A
- **Maximum Power:** 72W
- **Maximum Track Length per Power Cable:** 4000mm / 4m
- **Polarity Protection:** Reverse Polarity Protection
- **Compatibility:** MAGY Electrified Track System
- **Colour:** Black

Applications

The **Domus Line MAGY Magnetic Power Cable – 1m** is designed to provide the power connection for **MAGY electrified track lighting installations**. Its **magnetic head with micro contacts** connects to the electrified guide, while the **Micro24 male connector** connects to a compatible 24VDC power supply. Domus Line specifies a maximum connected track length of **4m per power cable** to maintain the system's maximum **3A / 72W** capacity and avoid voltage drops that could affect performance.

Property	Value
Voltage	24VDC
Colour	Black
Cable Length (m)	1
Connector	Micro24 Male
