

Salice Exedra Side Panel Connector Kit

Variant code: YE55KIT0006

The **Salice Exedra Side Panel Connector Kit** is a genuine installation accessory designed for use with the **Salice Exedra Pocket Door System**. Specifically developed for the **single-door version with milling**, this connector kit securely joins the side panels to the Exedra mechanism, ensuring accurate positioning and reliable structural support throughout the installation.

Engineered to Salice's renowned Italian quality standards, the connector kit is designed for cabinets with a **total external depth of 650mm to 900mm**. It provides the precision required for smooth operation of the Exedra pocket hinge and slide system while helping maintain the clean, minimalist appearance of modern pocket door furniture.

Suitable for both residential and commercial furniture manufacture, the Salice Exedra Side Panel Connector Kit is an essential component for achieving a professional installation and dependable long-term performance from the Exedra pocket door system.

Product Features

- Genuine Salice Exedra side panel connector kit
- Designed for the Salice Exedra Pocket Door System
- Suitable for single-door systems with milling
- Provides secure connection between side panels and mechanism
- Compatible with cabinets having an external depth of 650mm to 900mm
- Precision engineered for accurate installation
- Manufactured from durable, high-quality materials
- Suitable for professional furniture manufacture and installation

Product Benefits

- **Provides secure and accurate side panel connection for Exedra pocket door systems**

- **Designed specifically for single-door milled cabinet applications**
- **Helps ensure smooth, reliable operation of the Exedra hinge and slide mechanism**
- Supports precise cabinet assembly for a professional finish
- Compatible with a wide range of cabinet depths from 650mm to 900mm
- Durable construction delivers dependable long-term performance
- Simple integration with genuine Salice Exedra components
- Ideal for premium residential and commercial furniture installations

Technical Characteristics

- Product Type: Side Panel Connector Kit
- Brand: Salice
- Series: Exedra
- System Compatibility: Salice Exedra Pocket Door System
- Application: Single-Door Version with Milling
- Compatible Cabinet External Depth: 650mm to 900mm
- Installation: Side Panel Connection
