

Fastmount Drill 10mm With Shoulder – for use with Standard & Low Profile Ranges

Variant code: CT-01

Fastmount 10mm Shoulder Drill Bit is a purpose-designed installation tool engineered for accurate preparation of panels used with the **Fastmount Standard Profile** and **Low Profile** clip ranges. Featuring an integrated shoulder, the drill produces a precise hole depth while simultaneously creating the pilot hole required for the **Fastmount CT-07** installation tool, ensuring consistent and repeatable clip installation.

Manufactured with a **carbide-tipped cutting edge**, the drill bit delivers excellent durability, clean cutting performance and extended service life when drilling a variety of panel materials. Its precision design helps installers achieve accurate hole positioning and depth, reducing installation time while ensuring reliable engagement of Fastmount panel clips. For optimum results, installation should follow the relevant Fastmount installation guides.

As part of the Fastmount installation tool range, this drill bit supports the award-winning Fastmount concealed panel fixing system, allowing panels to be removed and refitted repeatedly in any sequence without damaging the installation.

Product Features

- Genuine Fastmount installation drill bit
- 10mm carbide-tipped shoulder drill
- Designed for Fastmount Standard Profile and Low Profile clip ranges
- Integrated shoulder provides consistent drilling depth
- Creates pilot hole for use with the Fastmount CT-07 installation tool
- Produces clean, accurate panel holes
- Long-lasting carbide cutting tip
- Suitable for professional panel installation applications

Product Benefits

- Ensures accurate hole depth for consistent Fastmount clip installation

- **Creates the required pilot hole for the Fastmount CT-07 tool in a single operation**
- **Carbide tip provides excellent durability and long service life**
- Produces clean, precise holes for professional installations
- Reduces installation time and improves repeatability
- Designed specifically for Fastmount concealed fixing systems
- Supports accurate alignment of panel mounting clips
- Ideal for commercial, marine and architectural panel installations

Technical Characteristics

- Product Type: Shoulder Drill Bit
- Brand: Fastmount
- Drill Diameter: 10mm
- Tip Material: Carbide
- Shoulder Design: Integrated Depth Stop
- Compatible Systems: Fastmount Standard Profile & Low Profile Ranges
- Compatible Tool: Fastmount CT-07 Installation Tool
- Application: Panel Drilling for Concealed Clip Installation

Applications

The **Fastmount 10mm Shoulder Drill Bit** is ideal for **interior fit-outs, architectural wall and ceiling panels, marine joinery, transport interiors, exhibition stands, cabinetry and commercial panel installations**. Designed specifically for the **Fastmount Standard Profile and Low Profile concealed fixing systems**, it enables fast, accurate preparation of panels for reliable clip installation and repeated panel removal and refitting.

Property	Value
Application	Panel Drilling for Concealed Clip Installation
