Fastmount Drill Gauge for use with CT-09 Drill Bit

Variant code: CT-09DG

Fastmount Drill Gauge (CT-09DG) is a precision depth control accessory designed for use with the **Fastmount® CT-09 10mm Forstner Drill Bit**. Engineered to ensure consistent blind hole depths, it helps achieve accurate installation of **Fastmount® Standard Profile and Low Profile male clips**, improving the quality and repeatability of concealed panel installations.

Manufactured from **machined aluminium** with a durable **red anodised finish**, the drill gauge is built to withstand regular workshop and on-site use while providing reliable depth control for professional installers. By preventing over-drilling, it helps ensure the correct seating of panel clips and contributes to a clean, accurate installation.

Please note: The **CT-09 Drill Bit is sold separately**.

The Fastmount® multi-award-winning concealed panel mounting system enables panels to be removed and refitted repeatedly in any sequence, making it the preferred solution for architectural joinery, furniture, marine and commercial interior applications.

Product Features

- Designed for use with the **Fastmount® CT-09 Drill Bit**
- Controls drilling depth for blind holes
- Suitable for **Standard Profile** and **Low Profile** male clips
- Precision machined aluminium construction
- Durable red anodised finish
- Helps achieve consistent installation accuracy
- **CT-09 Drill Bit sold separately**

Product Benefits

- Provides accurate and repeatable drilling depth
- Helps prevent over-drilling into panels
- Improves clip installation consistency
- Enhances the quality of concealed panel installations

- Durable construction for long service life

Technical Characteristics

- **Product Type:** Drill Gauge
- **Brand:** Fastmount
- **Model:** CT-09DG
- **Material:** Machined Aluminium
- **Finish:** Red Anodised
- **Compatible Drill Bit:** Fastmount® CT-09
- **Compatible Systems:** Fastmount® Standard Profile & Low Profile
- **Function:** Blind Hole Depth Control

Applications

Ideal for **cabinet makers, furniture manufacturers, shopfitters, joiners, marine installers, exhibition contractors and interior fit-out specialists** installing **Fastmount® Standard Profile and Low Profile concealed panel systems**. The drill gauge delivers precise depth control, helping achieve accurate, professional panel installations while supporting efficient and repeatable fitting procedures.
