Fastmount Install Tool for Low Profile Range - LP-F8 & LP-DF8 - Plastic

Variant code: CT-20

Fastmount Install Tool is a lightweight installation tool designed for fitting **Fastmount® Low Profile LP-F8 and LP-DF8 female clips** quickly and accurately using a battery drill with the correct torque setting. Manufactured from durable moulded plastic, it provides a simple and cost-effective solution for small installation projects and occasional use.

Specifically developed for the **Fastmount® Low Profile Range**, the CT-20 enables fast, consistent installation of female clips while helping to maintain correct alignment and reduce installation time. Designed for **up to 20 clip installations**, it is ideal for smaller jobs or trial assemblies. For larger installations exceeding 20 clips, Fastmount recommends using the **CT-19 aluminium installation tool** for increased durability and extended service life.

As part of the **Fastmount® multi-award-winning concealed panel mounting system**, the CT-20 helps installers achieve professional results while supporting the system's ability to remove and refit panels repeatedly in any sequence without damaging the concealed fixing.

Product Features

- Plastic installation tool for the **Fastmount® Low Profile Range**
- Compatible with **LP-F8** and **LP-DF8** female clips
- Designed for use with a battery drill at the correct torque setting
- Lightweight moulded plastic construction
- Quick and accurate clip installation
- Designed for **up to 20 clip installations**
- Ideal for occasional or small-scale installations
- For larger installations, use **CT-19 aluminium install tool**
- Genuine Fastmount® installation accessory

Product Benefits

Tel: 01626 333900
Email: info@swshardware.com

- Speeds up installation of Low Profile female clips
- Ensures consistent and accurate clip positioning
- Lightweight and easy to handle
- Cost-effective solution for small installation projects
- Reduces installation time and effort
- Supports professional concealed panel installations

Technical Characteristics

- **Product Type:** Clip Installation Tool
- **Brand:** Fastmount
- **Model:** CT-20
- **Range Compatibility:** Fastmount® Low Profile
- **Compatible Clips:** LP-F8, LP-DF8
- **Material:** Moulded Plastic
- **Installation Method:** Battery Drill (Correct Torque Setting)
- **Recommended Usage:** Maximum 20 Clip Installations
- **Application:** Female Clip Installation

Applications

The **Fastmount CT-20 Install Tool** is ideal for **marine interiors, automotive trim, furniture manufacturing, exhibition displays, retail fit-outs, commercial interiors, architectural joinery and bespoke panel installations**. Designed for installing **Fastmount® Low Profile LP-F8 and LP-DF8 female clips**, it provides a quick, accurate and efficient installation method for smaller projects while ensuring panels can be easily removed and refitted for maintenance or servicing.
