

Fastmount Panel Removal Tool Painted Panel – Glass Sucker – 40kg

Variant code: CT-17

Fastmount Panel Removal Tool is a professional-grade **glass suction cup** designed for the safe removal and handling of painted, pre-finished and decorative panels installed with the **Fastmount® concealed panel mounting system**. With a **40kg lifting capacity**, it provides a secure grip on smooth panel surfaces, allowing installers to remove panels efficiently while minimising the risk of surface damage.

Engineered for professional installation and maintenance, the CT-17 is ideal for handling finished panels where conventional removal methods could mark or damage the surface. For controlled and balanced panel removal, **two CT-17 glass suction cups are recommended**, ensuring panels can be safely detached, transported and reinstalled with confidence. Its robust construction and ergonomic design make it suitable for repeated workshop and on-site use across a wide range of industries.

As part of the **Fastmount® multi-award-winning concealed panel mounting system**, the CT-17 simplifies maintenance by allowing panels to be easily removed and refitted in any sequence without compromising the concealed fixing system.

Product Features

- Professional glass suction cup panel removal tool
- **40kg lifting capacity**
- Designed for painted and pre-finished panels
- Secure grip on smooth panel surfaces
- Ideal for panel removal and handling
- Durable, heavy-duty construction
- Ergonomic design for comfortable operation
- **Two suction cups recommended for controlled panel removal**
- Suitable for repeated professional use
- Genuine Fastmount® installation tool

Product Benefits

- Removes finished panels without damaging the surface
- Provides safe and controlled panel handling
- Simplifies maintenance and inspection access
- Improves efficiency during panel installation and removal
- Delivers reliable suction and secure lifting performance
- Built for long-lasting use in demanding environments

Technical Characteristics

- **Product Type:** Panel Removal Tool
- **Brand:** Fastmount
- **Model:** CT-17
- **Tool Type:** Glass Suction Cup
- **Lifting Capacity:** 40kg
- **Suitable For:** Painted and Pre-Finished Panels
- **Recommended Quantity:** Two tools for controlled panel removal
- **Application:** Panel Removal and Handling

Applications

The **Fastmount CT-17 Panel Removal Tool** is ideal for **architectural wall panels, ceiling systems, marine interiors, commercial fit-outs, exhibition displays, transport interiors, retail installations and bespoke joinery**. Designed for use with the **Fastmount® concealed panel mounting system**, it provides a safe and efficient method for removing and handling painted or pre-finished panels, allowing them to be easily removed and refitted in any sequence for maintenance, inspection or servicing.
