

Fastmount Panelsafe Self Tapping – Male

Variant code: PS-150

Panelsafe Self-Tapping Male Clip (PS-150) is a heavy-duty concealed panel fixing designed to provide secure panel retention while allowing controlled access for maintenance and inspection. As part of the **Fastmount® Panelsafe Range**, this self-tapping male clip is engineered to prevent accidental panel removal, making it ideal for applications where both accessibility and safety are essential.

Manufactured from high-performance engineering-grade polymer, the PS-150 installs quickly into suitable substrates using its self-tapping design, eliminating the need for pre-threading and simplifying installation. Designed to engage with compatible **Fastmount® Panelsafe female clips**, it creates a secure concealed fixing that allows panels to be repeatedly removed and refitted while remaining safely retained during servicing. Its robust construction delivers excellent vibration resistance and long-term reliability across demanding commercial, marine and transport environments.

As part of the **Fastmount® multi-award-winning concealed panel mounting system**, the PS-150 offers a professional removable fixing solution that combines dependable panel retention, fast installation and convenient maintenance access.

Product Features

- Panelsafe self-tapping male clip
- Designed for the **Fastmount® Panelsafe Range**
- Self-tapping installation for quick fitting
- Compatible with Fastmount® Panelsafe female clips
- Concealed removable fixing system
- Designed to safely retain removable panels
- Durable engineering-grade polymer construction
- Strong, vibration-resistant performance
- Suitable for repeated panel removal and reinstallation
- Genuine Fastmount® Panelsafe clip

Product Benefits

- Prevents accidental panel detachment during maintenance
- Provides a secure concealed fixing with controlled panel retention
- Self-tapping design reduces installation time
- Allows quick removal and refitting for servicing and inspection
- Delivers reliable long-term performance in demanding environments
- Maintains a clean, professional panel installation

Technical Characteristics

- **Product Type:** Self-Tapping Male Panel Retention Clip
- **Brand:** Fastmount
- **Model:** PS-150
- **Range:** Fastmount® Panelsafe
- **Clip Type:** Male
- **Installation:** Self-Tapping
- **Material:** Engineering-Grade Polymer
- **Application:** Concealed Safety Panel Retention
- **Mounting:** Removable Panel Fixing

Applications

The **Fastmount PS-150 Panelsafe Self-Tapping Male Clip** is ideal for **access panels, architectural wall and ceiling panels, marine interiors, transport vehicles, commercial buildings, healthcare facilities, public buildings, exhibition displays and industrial enclosures**. Designed for use with compatible **Fastmount® Panelsafe female clips**, it provides a secure, concealed and removable fixing solution that keeps panels safely retained while allowing convenient access for maintenance, inspection and servicing.

Property	Value
Material	Aluminium, Stainless Steel
Mounting Type	Self-Tapping
Drop Length (mm)	150
