

Fastmount Very Low Profile Extra Heavy Duty Clip – 25kg – Male

Variant code: VL-M3X

Fastmount Very Low Profile Extra Heavy Duty Clip – 25kg – Male

This Fastmount Very Low Profile Extra Heavy Duty Clip is designed for demanding applications where strength and space are critical. Engineered to withstand loads up to 25kg, it offers exceptional holding power while maintaining a minimal profile for sleek installations.

Key Features:

Extra Heavy Duty: Built to handle high loads and rigorous use.

Very Low Profile: Ideal for applications where space is limited.

Secure Fastening: Provides a reliable and robust connection.

Durable Construction: Made from high-quality materials for long-lasting performance.

Easy Installation: Quick and simple to install with compatible female counterparts.

Applications:

Marine: Securely mount equipment on boats, yachts, and other marine vessels.

Industrial: Ideal for heavy-duty applications in industrial settings.

Automotive: Suitable for mounting components in vehicles and other transportation.

Aerospace: Used in aerospace applications where weight and space are critical.

Architectural: For secure and discreet mounting in architectural projects.

Benefits:

Increased Strength: Ensures secure and reliable connections for heavy loads.

Space Saving: Maintains a low profile for sleek and unobtrusive installations.

Versatility: Suitable for a wide range of applications across various industries.

Enhanced Durability: Built to withstand harsh environments and demanding conditions.

Improved Aesthetics: Maintains a clean and professional appearance.

Find the perfect female counterpart for this male clip to complete your fastening solution.
