

Flush/Slide Door Bolt – 12" – Black

Variant code: 33392

We have an extensive range of door, window, french and flush bolts, ranging from 4" to 12".

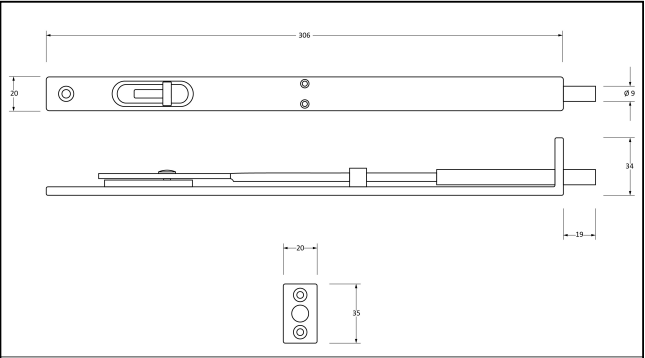

This flush bolt features a strong spring mechanism and can be used on sliding/folding door systems.

- Usually used to secure the slave door, it requires rebating into the surface or edge of your door.
- Maximum depth of cut out: 18mm.
- Supplied with matching SS wood screws.

Our pewter patina finish is forged from a durable base of steel and is a fine example of how our unique manufacturing techniques add further detail to the natural charm of metals. The process by which the contrasting textures of this finish are created results in a rich appearance that sits well in characterful, rustic homes but also offers a contemporary alternative in more modern settings.

Property	Value
Finish	Black
Width (mm)	21
Range	Flush
Overall Length (mm)	306

Gallery

Technical drawing of a door bolt assembly. The drawing includes three views: a top view showing a long rectangular bolt with a handle on the left and a locking mechanism on the right, with a length dimension of 306; a side view showing the bolt's profile with a height dimension of 20 and a locking mechanism height of 30; and a detail view of the locking mechanism showing a vertical plate with three circular holes, with a width dimension of 20 and a height dimension of 35. A small dimension of 19 is also indicated for the locking mechanism's base.

Please Note, due to the hand crafted nature of our products all measurements are approximate and should be used as a guide only.
