

Foldaside 50 – 4 Wheel Intermediate Hanger

Variant code: 01821

The **Foldaside 50 4 Wheel Intermediate Hanger** is a precision-engineered component designed for use within the Foldaside 50 folding door hardware system. Developed to support smooth and reliable operation, it is suitable for internal and external folding door applications with door leaves weighing up to **50kg per panel**.

Designed to work alongside pivot bearings, hinges and associated Foldaside hardware components, the intermediate hanger helps maintain accurate panel alignment and controlled movement throughout the folding door system. The integrated **4 wheel design** supports smooth running and improved load distribution, contributing to quieter and more efficient door operation.

As part of the Foldaside 50 system, the hanger assists in bringing folding door panels together neatly while supporting consistent performance in residential and commercial installations.

Product Features

- **4 wheel intermediate hanger** for Foldaside 50 systems
- Suitable for folding doors up to **50kg per leaf**
- Designed for internal and external folding door applications
- Supports smooth and controlled panel movement
- Helps maintain accurate door panel alignment
- Compatible with Foldaside hinges and pivot systems
- Precision-engineered for reliable operation

Product Benefits

- Improves folding door movement and running performance
- Supports stable and consistent panel alignment
- Helps reduce operational friction and wear
- Suitable for residential and commercial

- installations
- Enhances reliability of folding door systems
 - Supports smooth opening and closing action
 - Designed for long-term professional use

Technical Characteristics

- Product type: **Intermediate hanger**
- Wheel configuration: **4 wheel design**
- System compatibility: **Foldaside 50**
- Maximum door weight: **50kg per leaf**
- Suitable for internal and external folding doors
- Designed for use with compatible Foldaside hardware systems
- Install according to manufacturer guidance

Applications

The **Foldaside 50 4 Wheel Intermediate Hanger** is suitable for use in **residential, commercial and architectural folding door installations** where smooth and reliable door operation is required. It is ideal for internal room dividers, patio door systems and large folding door applications using the Foldaside 50 hardware range. Its precision movement and alignment support make it particularly suitable for high-use environments requiring dependable folding door performance.
