Folding Pocket Door System - 1207mm Shaft Bar - 1 Pack for Pair of Doors

Variant code: 29475-48

Folding Pocket Door System Shaft Bar is a genuine replacement and installation component designed for compatible Sugatsune **Folding Pocket Door Systems**. Measuring **1207mm** in length, this precision-engineered shaft bar forms a key part of the folding door mechanism, ensuring smooth, reliable synchronisation and operation of paired folding pocket doors. Supplied as **one pack for a pair of doors**, it is ideal for new installations, repairs and replacement projects.

Manufactured to Sugatsune's exacting quality standards, the shaft bar provides the strength and dimensional accuracy required for dependable long-term performance. Designed specifically for use within the Folding Pocket Door System, it integrates seamlessly with the associated hardware to support smooth folding and pocketing of doors while maintaining correct alignment throughout operation.

Suitable for professional cabinet makers, furniture manufacturers and architectural joinery specialists, this genuine Sugatsune component helps ensure optimal performance and longevity of folding pocket door installations in both residential and commercial environments.

Product Features

- Genuine Sugatsune Folding Pocket Door System component
- 1207mm shaft bar
- Supplied as one pack for a pair of doors
- Precision-engineered for smooth door operation
- Maintains correct alignment of folding pocket door systems
- Designed for use with compatible Sugatsune hardware
- Suitable for new installations and replacement applications
- Professional-quality construction for long service life

Product Benefits

Tel: 01626 333900
