Full Extension Slides Hold Closed - 304 Stainless Steel - 44kg - 500mm

Variant code: ESR-DC4513-20

Full Extension Slides Hold Closed - 304 Stainless Steel are heavy-duty telescopic runners designed to deliver smooth, reliable drawer movement in demanding residential, commercial and marine environments. With a **44kg load capacity** and **500mm slide length**, these precision-engineered slides provide full access to drawer contents while offering excellent corrosion resistance for long-term performance.

Featuring **full extension travel**, the slides allow the drawer to open completely for maximum accessibility. An integrated **hold-in detent** keeps the drawer securely closed during movement or vibration, while the **positive stop** prevents accidental over-travel. The convenient **front disconnect** mechanism enables quick removal and reinstallation of the drawer for cleaning, maintenance or installation.

Manufactured from **304 stainless steel**, these drawer slides are suitable for humid, corrosive and high-use environments where durability and reliability are essential. Their **non-handed design** allows installation on either the left or right side, simplifying fitting and reducing inventory requirements.

Product Features

- Full extension telescopic drawer slides
- 304 stainless steel construction
- **500mm slide length**
- **44kg load capacity**
- Hold-in detent keeps drawer securely closed
- Positive stop prevents over-extension
- Front disconnect for quick drawer removal
- Non-handed design for left or right installation
- Smooth, precision ball-bearing operation
- Corrosion-resistant construction

Product Benefits

- Provides full access to drawer contents

- Keeps drawers securely closed during transport or vibration
- Simplifies drawer removal for maintenance and cleaning
- Excellent corrosion resistance for demanding environments
- Smooth, reliable operation with minimal effort
- Suitable for long-term commercial and marine use

Technical Characteristics

- **Product Type:** Full Extension Drawer Slides
- **Material:** 304 Stainless Steel
- **Slide Length:** 500mm
- **Load Capacity:** 44kg
- **Extension Type:** Full Extension
- **Disconnect Type:** Front Disconnect
- **Retaining Feature:** Hold-In Detent
- **Stop Type:** Positive Stop
- **Handing:** Non-Handed
- **Mounting:** Side Mounted
- **Application:** Drawers and Pull-Out Storage

Applications

Full Extension Slides Hold Closed - 304 Stainless Steel are ideal for **kitchens, laboratories, hospitals, marine vessels, food preparation areas, commercial furniture, industrial storage units, workshop cabinets and retail fixtures**. Designed for applications requiring **full drawer access, secure closed positioning and corrosion resistance**, they provide dependable performance in environments where durability, hygiene and ease of maintenance are essential.

Property	Value
Finish	Plain
Width (mm)	12.7
Length (mm)	500mm when closed ; 1000mm when open
Load Capacity (kg)	44
Height (mm)	44.7
Material	304 Stainless Steel
Mounting Plate Type	Side mount
