

Glass Door Lock Will Suit 6 – 8mm Glass – Random Keyed – Polished Chrome

Variant code: AGL02208CP.RD

Glass Door Lock is a premium cylinder lock designed to securely lock **6mm to 10mm glass swing doors** on display cabinets and showcases. Supplied with a **random keyed cylinder**, this high-quality lock provides dependable security while maintaining the elegant appearance of frameless glass installations. Manufactured from durable **rubber brass and zinc alloy**, it offers long-lasting performance in both commercial and residential environments.

Designed to work seamlessly with compatible **Sugatsune glass hinges and glass brackets**, the lock creates a coordinated hardware solution for glass showcases. The integrated **strike plate also functions as a door stopper**, helping to provide smooth, stable and reliable locking operation while protecting the glass door during closing. Available in **Black, Polished Chrome and 24K Gold Plated** finishes, it complements a wide variety of cabinet designs.

Ideal for retail displays, jewellery cabinets and museum showcases, this glass door lock combines security, durability and premium aesthetics. Its simple installation and precision-engineered components make it an excellent choice for professional glass cabinet installations.

Product Features

- Premium glass showcase cylinder door lock
- Suitable for 6mm to 10mm glass swing doors
- Random keyed cylinder
- Manufactured from stainless steel and zinc alloy
- Strike plate doubles as a door stopper
- Designed for use with compatible Sugatsune glass hinges and brackets
