

Hawa Cover Cap Set

Variant code: 30485

Hawa Porta 60/100 HMD Acoustics Cover Cap Set (Art. No. 30485)

Improve the aesthetic and functional finish of your sliding door system with the **Hawa Porta 30485 Cover Cap Set**. Specifically designed for the **Hawa Porta 60 HMD, Porta 100 HMD**, and their **Acoustics** variants, this anthracite plastic end-component set provides a seamless, professional look for high-end residential and commercial interiors.

Product Overview

The Hawa 30485 is a comprehensive panel end-component set featuring a 95 mm (3 3/4") profile.¹ It is engineered to conceal the technical hardware of the sliding track, protecting the internal components from dust while ensuring a sleek, minimalist design.

Key Specifications:

- **Article Number:** 30485
- **Material:** High-quality Plastic
- **Colour/Finish:** Anthracite (RAL 7016 style)³
- **Length:** 95 mm (3 3/4")
- **Compatibility:** Hawa Porta 60 HMD, Porta 100 HMD, and Acoustics versions.
- **Set Includes:** 2x Panel end components (Art. No. 30133) and 2x Limiters for wooden/aluminium panels (Art. No. 057.3126.101).

Why Choose the Hawa 30485 Cover Cap Set?

1. Integrated Acoustic Performance

Unlike standard sliding door caps, the 30485 set is a core component of the **Hawa Porta Acoustics** system. It works in tandem with the system's sound-attenuating seals to reduce noise transmission, making it ideal for home offices, bedrooms, and conference rooms.

2. Tool-Free "Fixation Clip" System

The set includes integrated fixation clips that allow for a secure, "click-in" installation. This reduces labour time and prevents the caps from loosening

over time due to door vibrations.

3. Professional Anthracite Finish

The modern anthracite colour is designed to blend perfectly with contemporary hardware trends, matching dark-anodized tracks or providing a sharp contrast to natural wood and white-lacquered doors.

Competitive Comparison: Hawa vs. Standard Generic Hardware

Feature	Hawa 30485 Set	Standard Generic End Caps
Fit & Tolerance	Precision engineered for Porta 60/100 tracks.	Often "universal," leading to gaps or rattling.
Installation	Snap-on fixation clips included.	Usually requires adhesives or visible screws.
Acoustics	Compatible with sound-dampening kits.	No specific acoustic properties.
Durability	UV-resistant, high-grade plastic (Swiss made).	Standard plastic that may yellow or become brittle.

Frequently Asked Questions

Q: Is the Hawa 30485 compatible with Hawa Junior 80 tracks? **A:** No. The 30485 set is specifically sized for the **Hawa Porta** series (60 and 100 HMD). For Junior 80 systems, you would typically look for Art. No. 24957 or similar metal end caps.

Q: Does this set include the limiters? **A:** Yes. This is a complete set that includes both the panel end components and the necessary limiters to prevent over-travel of the sliding door.

Q: Can I paint these cover caps? **A:** While the anthracite finish is durable, the plastic surface can be painted with a suitable plastic-bonding primer if a custom RAL colour is required for your project.

Q: How does the "Acoustics" version differ? **A:** While the cap itself provides the visual finish, the 30485 is designed with the geometry required to clear the specialised gaskets used in the Hawa Porta Acoustics system, ensuring a tight seal when the door is closed.

Installation Tip for Pros

When installing on a **Hawa Porta 100 HMD**, ensure the panel end component is fully clicked into the fixation clip until you hear a distinct "snap." This ensures that the limiter (included in the set) is positioned correctly to protect your soft-close or stopper mechanism from impact damage.
