

Hawa Disposable cover – Plastic – L=2000 mm

Variant code: 057.3098.001

Protect your investment and ensure a flawless finish with the **HAWA Disposable Cover (L=2000 mm)**. Specifically engineered for professional-grade sliding door systems like the **HAWA Porta** and **HAWA Divido** series, this high-quality plastic cover is an essential accessory for contractors, architects, and DIY enthusiasts who demand precision and cleanliness.

HAWA Disposable Plastic Cover (2000 mm) | Professional Sliding Door Protection

When installing premium sliding hardware, the most critical phase is the construction or renovation period. Dust, paint, and debris can easily infiltrate the running tracks, leading to premature wear or noisy operation. The **HAWA 057.3098.001 Disposable Cover** provides a temporary yet robust barrier that keeps your tracks pristine until the project is complete.

Key Features & Benefits

- **Optimal Length:** At 2000 mm, this cover provides seamless, end-to-end protection for standard track lengths.
- **Precision Fit:** Designed specifically for the **HAWA Porta 60/100** and **Divido 100** systems, ensuring no gaps where dust can enter.
- **Durable Plastic Construction:** Made from high-grade, impact-resistant plastic that stands up to the rigors of a construction site.
- **Swiss Engineering:** Manufactured by HAWA Sliding Solutions in Switzerland, adhering to the highest industry standards for quality and reliability.
- **Easy Installation & Removal:** Slides or clips into place effortlessly and can be removed in seconds once the site is ready for final door hanging.

HAWA vs. Standard Competitor Covers

Not all protective covers are created equal. Below is a comparison of why the **HAWA 2000 mm Plastic Cover** is the superior choice for your project.

Feature	HAWA Disposable Cover (2000 mm)	Generic "Cut-to- Fit" Plastic Strips
Material Quality	High-density, rigid plastic for structural integrity.	Thin, flimsy PVC or polyethylene.
Fitment	Custom-moulded for HAWA track geometries.	Universal/Loose fit; often requires tape.
Protection Level	Full-seal protection against dust, paint, and plaster.	Partial protection; prone to shifting.
Residue	Leaves zero residue; no adhesive required.	Often requires tape that leaves sticky marks.
Sustainability	Precision manufactured to trim and reduce waste.	High waste due to trimming and poor durability.

Why HAWA is better: Generic covers often rely on adhesive tape, which can leave a sticky residue inside the track—ironically attracting more dust. The **HAWA system** is designed to sit perfectly within the track profile, offering "set-and-forget" protection that guarantees a smooth-running door for years to come.

Frequently Asked Questions (FAQ)

1. Can the HAWA disposable cover be reused?

While designed as a "disposable" item for the duration of a construction project, the high-quality plastic is durable enough to be cleaned and reused on multiple installations if handled carefully.

2. Is this cover compatible with other brands' tracks?

This cover is specifically engineered for **HAWA Porta 45/60/100** and **HAWA Divido** tracks. While it may fit other tracks with similar internal dimensions, we recommend it primarily for HAWA systems to ensure a perfect seal.

3. Can I cut the 2000 mm length if my track is shorter?

Yes. The plastic material can be easily cut to size

using standard site tools (like a fine-toothed saw or heavy-duty shears) for custom track lengths.

4. Why should I use a cover instead of just cleaning the track later?

Construction dust—especially drywall dust and metal shavings—is abrasive. If a door is tested or operated in a dirty track, it can permanently score the running surface or damage the ball bearings in the trolleys. Prevention is significantly cheaper than replacement.
