

Hawa Folding Concepta III V2 – Running Track Adapter with Depth Adjustment – 4-Door Composed Cabinet

Variant code: 52726

The **Hawa Folding Concepta III V2 Running Track Adapter** is a dedicated system component designed for use with a **4-door composed cabinet** configuration. It forms part of the Folding Concepta III V2 hardware system and is used in conjunction with the corresponding running track arrangement.

The adapter incorporates **depth adjustment**, allowing the running track position to be adjusted during installation. This provides an adjustment point for accurately setting up the track within the corresponding **4-door composed cabinet** arrangement.

Designed specifically for the **Hawa Folding Concepta III V2** system, this adapter is a dedicated installation component rather than a complete door hardware set. It should be used with the appropriate compatible Folding Concepta III V2 components required for the complete cabinet configuration.

Product Features

- **Running track adapter** for Hawa Folding Concepta III V2 systems
- Designed specifically for a **4-door composed cabinet**
- Features integrated **depth adjustment**
- Provides an adjustable connection for the corresponding **running track installation**
- Forms part of the modular **Folding Concepta III V2** hardware system
- Designed for use with the appropriate compatible **Folding Concepta III V2 system components**
- Supplied as a **system component** rather than a complete door hardware set

Product Benefits

- **Depth adjustment enables the running track position to be fine-tuned during**

installation

- **Purpose–designed for 4–door composed cabinet configurations within the Folding Concepta III V2 system**
- **Dedicated system compatibility provides the appropriate adapter for the corresponding running track arrangement**
- **Supports accurate running track positioning and alignment**
- **Modular design allows the adapter to be incorporated with the appropriate Folding Concepta III V2 components**
- **Suitable for professional furniture and cabinet installations**

Technical Characteristics

- **Product Type:** Running Track Adapter
- **System:** Folding Concepta III V2
- **Adjustment:** Depth Adjustment
- **Cabinet Configuration:** 4–Door Composed Cabinet
- **Application:** Running Track Installation
- **Product Category:** System Component / Accessory
- **Installation:** For Compatible Folding Concepta III V2 Systems

Applications

The **Hawa Folding Concepta III V2 Running Track Adapter with Depth Adjustment** is designed specifically for **4–door composed cabinet installations** using the Folding Concepta III V2 system. It provides an adjustable interface for the corresponding running track, allowing the **track depth to be adjusted during installation** as part of the complete furniture hardware arrangement.
