

Hawa Porta 60/100 Cover Cap Set – Soft Close

Variant code: 042.3114.071

Hawa Soft Close Cover Cap Set (60/100 Building)

‘Futurise’ the aesthetics and functionality of your sliding door system with the **Hawa Soft Close Cover Cap Set**. Specifically designed for the **Hawa Porta 60/100** and **Hawa Divido 100** series, this essential finishing component ensures that the assembly opening of your soft-close mechanism remains hidden, providing a sleek, professional, and flush architectural finish.

Whether you are installing a high-end pocket door or a ceiling-recessed sliding partition, this cover cap set is the final touch needed for a seamless "invisible technology" look.

Key Features & Benefits

- **Seamless Integration:** Designed to perfectly snap into the assembly opening of Hawa Porta 60/100 tracks, hiding the internal soft-close components.
- **High-Quality Material:** Crafted from durable, industrial-grade grey plastic that matches the internal fittings and provides long-lasting protection against dust and debris.
- **Swiss Precision Engineering:** Part of the Hawa Sliding Solutions ecosystem, ensuring a perfect fit without the need for adhesive or complex tools.
- **Universal Compatibility:** Works with both the **Building 60** (up to 60kg) and **Building 100** (up to 100kg) soft-close sets.
- **Maintenance-Friendly:** Easily removable if you ever need to access the soft-close unit for adjustment or maintenance.

Technical Specifications

- **Manufacturer:** Hawa Sliding Solutions AG
- **Code Number (MPN):** 042.3114.071
- **Set Composition:** 1 x Cover Cap and 1 x Screw Set.
- **Compatibility:** Hawa Porta 60/100 H, HM, HC, HMD, and Divido 100 H/HM series.
- **Installation Type:** Press-fit / Screw-fix.

Comparison: Hawa vs. Standard Competitors

When choosing sliding door hardware, architects and contractors often compare **Hawa** with brands like **Sugatsune (Lapcon)** or **Richelieu**.

Feature	Hawa Soft Close (042.3114.071)	Standard Competitor (Generic)
Aesthetics	Fully integrated, flush-to-track design.	Often bulky, external "add-on" look.
Engineering	Swiss-engineered for 100,000+ cycles.	Variable quality; prone to "clicking" noises.
Installation	Dedicated assembly openings with custom caps.	Requires manual track modification/cutting.
Material	UV-stable, high-impact plastic.	Basic PVC or recycled plastics.

Why choose Hawa? While competitors may offer lower entry prices, Hawa is the gold standard for "silent luxury." Their systems are designed to be forgotten—operating without noise and remaining invisible within the ceiling or wall.

FAQ's

Q: What is the purpose of the Hawa 042.3114.071 cover cap? A: It is used to cover the routing/assembly opening in the running track where the soft-close mechanism is inserted. It ensures a clean visual appearance and prevents dust from entering the track.

Q: Is this cap compatible with the Hawa Junior series?

A: No, this specific set is designed for the **Porta 60/100** and **Divido 100** Building series. For Hawa Junior, you would typically use the SoftMove series components.

Q: Can I retrofit this onto an existing sliding door?

A: Yes, if your Hawa Porta track has an assembly opening (often used when upgrading to soft-close), this cap can be retrofitted to finish the installation.

Q: Do I need tools to install the cover cap?

A: The cap itself is often a press-fit design, but this set includes a screw set (600.0000.566) for

secure mounting according to Hawa's professional installation guidelines.

Hawa Soft Close Tech Tip

This video provides a practical look at how Hawa soft-close systems are installed and adjusted, which is helpful for understanding where components like cover caps fit into the assembly.
