

Hawa Porta 60/100 HMD Clip-on Panel for Wall Mounting – Aluminium Black Anodised – 2500mm

Variant code: 057.3113.255

Hawa Porta 60/100 HMD Clip-on Panel – For Wall Mounting

The **Hawa Porta 60/100 HMD Clip-on Panel**. Specifically engineered for wall-mounted applications, this high-quality aluminium fascia provides a sleek, professional finish by concealing the running track and hardware. Designed for seamless integration with the Hawa Porta 60 and 100 HMD series, it is the premier choice for architects and interior designers seeking a "hardware-free" minimalist look.

Key Features & Benefits

- **Tool-less Installation:** Features a sophisticated "clip-on" mechanism that allows for quick, snap-in mounting without the need for visible screws or complex tools.
- **Minimalist Design:** The low-profile aluminium profile ensures that the focus remains on your door design, not the mechanical components.
- **Durable Finish:** Available in **Anodized Aluminium (Silver)** and the sophisticated **Black Edition**, offering corrosion resistance and a premium feel.
- **Maintenance Friendly:** The panel can be easily removed and re-attached, providing instant access to the running track and soft-close mechanisms for adjustments.
- **Versatile Compatibility:** Fully compatible with both the **Hawa Porta 60 HMD** (up to 60 kg) and **Hawa Porta 100 HMD** (up to 100 kg) systems.

Technical Specifications

Specification	Details
Material	High-grade Aluminium
Mounting Type	Wall-mounted (Clip-on)
Compatibility	Hawa Porta 60 HMD /

Specification	Details
Available Lengths	100 HMD 2000mm, 2500mm, 3500mm, 6000mm (Cut- to-size available)
Finish Options	Plain Aluminium, Silver Anodized, Black Anodized
Application	Residential, Commercial, and Office Interiors

Why Choose Hawa Porta HMD over Standard Systems?

When compared to standard "U-channel" or generic box-track covers, the **Hawa Porta 60/100 HMD Clip-on Panel** offers distinct advantages for modern construction:

Lower Profile: While many competitors require a bulky 70mm–80mm height to hide hardware, the Hawa HMD system maintains a minimal installation height, making it ideal for low-ceiling or tight-clearance areas.

Integrated Productivity: Unlike standard fascias that require drilling into the track or wall, the Hawa clip system uses pre-installed clip components. This prevents "construction contamination"—you can install the panel at the very end of the project to keep it pristine.

Acoustic Compatibility: This panel is specifically designed to work with Hawa's **Acoustic** sets, which dampen noise and prevent drafts—a feature rarely found in basic sliding door covers.

Frequently Asked Questions (FAQ)

Q: Can I use this panel for a ceiling-mounted track?

A: No, this specific model (HMD) is optimised for **wall mounting**. For ceiling applications, you should look for the Hawa Porta "HC" or "H" variants which feature different fascia geometries.

Q: Does the panel come with the clips included?

A: Usually, the panel is sold as a separate profile. You will need the **Clip Component Set (Art. No. 057.3117.001)** to attach it to the running track.

Q: Can I cut the aluminium panel to a custom length?

A: Yes, the aluminium is easily cut with a standard metal saw. We recommend using a track cleaner

after cutting to ensure no debris interferes with the clip mechanism.

Q: Is there an end cap available to hide the side profile?

A: Yes, Hawa offers matching **End Cap Sets** in plastic (Anthracite or Black) that perfectly match the fascia profile for a 360-degree finished look.
