

Hawa Porta 60/100 HMD End Cap Set Limiter – Plastic Anthracite

Variant code: 057.3131.072

Enhance the aesthetics and safety of your sliding door system with the **Hawa Porta 60/100 HMD End Cap Set**. Specifically designed for the Hawa Porta HMD series, these end caps provide a sleek, professional finish while doubling as a functional safety component.

Whether you are finishing a minimalist residential project or a high-traffic commercial office, these end caps are the "final touch" that hides internal hardware and ensures long-term track integrity.

Product Overview

The **Hawa Porta 60/100 HMD End Cap Set** (available in **Anthracite** or **Black**) is a premium accessory for top-running wooden sliding doors. It is engineered to fit perfectly with the Hawa Porta 60 and 100 HMD running tracks and clip-on fascia profiles.

Key Features & Benefits

- **Aesthetic Integration:** Conceals the ends of the aluminium running tracks and clip-on panels for a seamless, "frameless" look.
- **Built-in Safety:** Includes a **track limiter/buffer** that prevents the door from over-traveling, protecting both the door and the wall.
- **Precision Fit:** Designed specifically for HMD (Surface Mounted/Ceiling) systems, ensuring no gaps or loose fittings.
- **High-Quality Material:** Constructed from durable, UV-resistant plastic that maintains its colour and structural integrity over time.
- **Black Edition Compatible:** The black finish is perfect for the trendy "Industrial" or "Black Edition" interior design styles.

Technical Specifications

Attribute	Specification
Manufacturer	Hawa Sliding Solutions (Swiss Engineered)
System Compatibility	Hawa Porta 60 HMD /

Attribute	Specification
Material	Hawa Porta 100 HMD

Door Weight Capacity	Supports systems up to 60kg or 100kg
Package Contents	Set of 2 End Caps, Fixation Clips, and Limiters

Comparison: Hawa Porta HMD vs. Standard Hardware

When choosing sliding door accessories, the difference lies in the precision of the "Soft-Stop" and the profile fit.

Feature	Hawa Porta 60/100 HMD Set	Standard/Generic End Caps
Fit	Tool-less, clip-on precision	Often requires adhesive or screws
Function	Integrated track limiter included	Decorative only; requires separate stop
Longevity	Tested for 100,000+ cycles	Prone to cracking or falling off
Design	Flush finish with Hawa Fascia	Bulky or mismatched profiles

Frequently Asked Questions (FAQ)

1. Does this set work with both the 60kg and 100kg systems?

Yes. The "HMD" track profile is standardised across the **Porta 60** and **Porta 100** series, making this end cap set compatible with both weight classes.⁴

2. Can I use these for a Pocket Door (HMT) system?

While they are similar, this specific set is optimized for **HMD (Surface/Ceiling Mounted)** systems where the track ends are visible. For wall-pocket (HMT) solutions, different finishing components may be required depending on your trim.

3. Are tools required for installation?

The end caps are designed for easy, "push-fit"

installation. However, you may need a screwdriver to adjust the integrated track limiter to your preferred door stopping point.

4. Why should I choose the "Black" finish?

The **Black Edition** is ideal if you are using black-anodized tracks. It creates a unified, modern look that is highly sought after in contemporary architecture.
