Hawa Concepta III 25 - Sliding Door Hardware - Complete Set for Pull Doors - 1200-2200mm - Right Hand

Variant code: C25R.PULL

Hawa Concepta III 25 Sliding Door Hardware: The Ultimate Pivot/Slide-In System for Seamless Design

Hawa Concepta III 25 Complete Set, the premium **sliding door hardware** solution engineered for **Pull and Push doors**. This innovative system transforms standard doors into elegant **pivot/slide-in pocket doors**, allowing them to disappear seamlessly into furniture units, cabinets, or wall recesses for a clean, **handle-less design** or a sophisticated pull-handle look.

Key Features & Design Versatility

The Concepta III 25 set is designed for **wooden doors** with a height range of **1200–2200mm** (3' 11 1/4" to 7' 2 5/8") and supports a door weight capacity of **6 to 25 kg** (13 to 55 lbs.). This makes it the ideal choice for creating functional and **space-saving** features in various applications, including:

- **Modern Kitchen Cabinets** and **Pantry Doors**
- **Home Office** and **Integrated Workspaces**
- **Wardrobes**, **Closets**, and **Walk-In Closets**
- **Media Centers** and **Equipment Storage**

Dual Functionality: Pull or Push

This complete set offers flexible operation to match your aesthetic vision:

- **Pull-to-Open:** Perfect for a traditional look, this version uses a standard **decorative pull handle** and features an integrated **soft-closing mechanism** for silent, smooth operation.
- **Push-to-Open (Handle-Less):** Achieve a completely **flush front design** with no visible hardware. A gentle push on the door edge activates the mechanism, sliding the door out of its recess for

access. This is the ultimate choice for minimalist, **invisible technology** designs.

Installation & Comfort

The Hawa Concepta III series prioritises **easy installation** and superior user comfort.

- **Intuitive Adjustment:** The system boasts a high degree of pre-assembly and features **easily accessible adjustment points**, allowing for quick, precise, and **tool-free adjustment** in multiple directions *without* having to remove the door. This saves valuable time on site.
- **Smooth Motion:** Experience **ergonomic movement support** and ultra-quiet operation, thanks to the concealed hinge with an **integrated damper** and optimised curve technology. The entire mechanism **retracts fully into the pocket** (pocket door hardware), ensuring an even gap pattern and an aesthetically pleasing, uniform front.

Hawa Sliding Door Hardware Concepta III complete set for 1200-2200mm height doors.

Simplicity is part of the concept with Hawa Concepta III, architects, planners and fabricators were included directly in the development of the next Hawa Concepta with a very positive outcome. The high degree of pre-assembled parts reduces the amount of work and tools required on site. Add to that the fact that adjustments can be carried out in a flash in situ without having to remove the door, achieved via easily accessible adjustment points saving valuable time.

Be it with high doors or with multiple doors, with or without handle; no matter which design option is required: Hawa Concepta III makes it possible to design the right solution for every request.
