Sugatsune Heavy Duty Mounting Plate Spacer - 2mm

Variant code: ACH09902

Sugatsune Heavy Duty Mounting Plate Spacer - 2mm is designed to provide precise spacing adjustment between the cabinet carcass and hinge mounting plate in concealed hinge installations. Manufactured by **Sugatsune**, a globally recognised specialist in precision-engineered architectural hardware, this spacer supports accurate door alignment and consistent reveals in high-performance cabinetry.

Engineered for use with heavy-duty concealed hinge systems, the spacer introduces a **fixed 2mm offset**, allowing installers to fine-tune hinge positioning without changing mounting plates. This is particularly useful in applications where minor adjustments are required to achieve optimal door clearance, alignment, or to accommodate material tolerances. The spacer integrates seamlessly within the hinge assembly, maintaining full functionality and adjustment capability.

Its robust construction ensures reliable performance under repeated use, while the compact design allows it to sit discreetly behind the mounting plate without affecting cabinet aesthetics. The spacer is suitable for use across a range of cabinet configurations, helping maintain consistent door gaps and smooth operation in both residential and commercial joinery projects.

Product Features

- **2mm spacing adjustment** for precise hinge positioning
- Designed for **heavy-duty concealed hinge systems**
- Improves **alignment and door clearance**
- Compact design for discreet installation
- Maintains full hinge functionality and adjustment
- Compatible with Sugatsune mounting plates

Product Benefits

- Allows fine adjustment without changing mounting plates
- Supports consistent and accurate door alignment

- Improves overall cabinet fit and finish
- Helps achieve even gaps across multiple doors
- Enhances installation flexibility on-site
- Suitable for residential and commercial cabinetry

Technical Characteristics

- Spacer component for hinge mounting plate positioning
- Fixed thickness for consistent spacing results
- Designed for integration with concealed hinge systems
- Installed between cabinet panel and mounting plate
- Does not interfere with hinge adjustment mechanisms
- Suitable for use in various cabinet constructions

Applications

This mounting plate spacer is used in cabinetry where precise hinge positioning and door alignment are required. It is particularly useful in kitchens, wardrobes, office furniture and bespoke joinery where consistent reveals and smooth door operation are critical. The 2mm offset provides a simple and effective solution for installers needing to adjust hinge positioning without replacing components, ensuring flexibility and accuracy across a wide range of cabinet installations.
