

Sugatsune Heavy Duty Concealed Cabinet Hinge – Boss Spacer

Variant code: ACH09005

Sugatsune Heavy Duty Concealed Cabinet Hinge – Boss Spacer is designed to support accurate hinge installation and alignment by providing controlled spacing between the hinge boss and cabinet door. Manufactured by **Sugatsune**, a globally recognised specialist in precision architectural and furniture hardware, this component ensures consistent positioning and reliable performance in heavy-duty concealed hinge applications.

The boss spacer is installed in conjunction with concealed hinge systems to **optimise hinge positioning and depth alignment**, helping achieve correct door geometry and smooth operation. By maintaining precise spacing, it supports proper hinge function and contributes to consistent door gaps, improved alignment and long-term durability of the installation.

Designed for compatibility with **Sugatsune heavy-duty concealed hinges**, the spacer integrates seamlessly into the hinge fixing system without affecting hinge movement. It is suitable for use across a range of cabinet constructions and door materials where accurate hinge placement is critical to performance.

Manufactured from durable materials, the spacer is engineered to withstand repeated use and maintain dimensional stability over time. Its compact design allows for straightforward installation while supporting the overall integrity of the hinge fixing system.

Product Features

- Designed to **provide spacing for hinge boss installation**
- Compatible with **Sugatsune heavy-duty concealed hinges**
- Supports accurate hinge positioning and alignment
- Helps maintain consistent door geometry
- Compact and durable construction
- Simple integration into hinge fixing systems

Product Benefits

- Improves hinge installation accuracy
- Supports smooth and reliable door operation
- Helps achieve consistent door gaps and alignment
- Enhances overall hinge performance and longevity
- Reduces installation errors and adjustment time
- Suitable for residential and commercial cabinetry

Technical Characteristics

- Spacer component for hinge boss positioning
- Designed for use with concealed hinge systems
- Compatible with Sugatsune heavy-duty hinge ranges
- Installed between hinge boss and cabinet door
- Durable material construction for long-term stability
- Suitable for precision cabinet installations

Applications

This boss spacer is used in cabinetry where concealed hinges require precise positioning to ensure correct door alignment and smooth operation. It is commonly specified in kitchens, wardrobes, office furniture and commercial joinery projects where accuracy and durability are critical. The spacer is particularly useful in installations involving thicker doors or complex cabinet configurations, where maintaining consistent hinge geometry is essential for optimal performance.
