Sugatsune Heavy Duty Lamp Lift Assist Damper - 95° Soft Close Counter Flaps - Nickel - 25-35 N·m/pc Brown covers

Variant code: CFDXL-BN

Sugatsune Heavy Duty Flap Lift Assist Damper - 95° Soft Close - Nickel is engineered to provide controlled lifting and soft-closing performance for counter flaps and downward-opening cabinet doors. Manufactured by **Sugatsune**, a globally recognised specialist in premium motion hardware, this damper system ensures smooth operation, enhanced safety and long-term durability in demanding applications.

Designed for **counter flap applications**, the mechanism assists in lifting and supports the controlled descent of the flap, preventing sudden drops. The integrated **soft-close damping function** ensures the flap closes smoothly and quietly, reducing impact and protecting both the cabinet structure and user. With an opening angle of **up to 95°**, it allows practical access while maintaining stable operation.

This heavy-duty unit delivers a torque range of **25–35 N·m per piece**, making it suitable for medium to heavier flap panels. The system is typically installed in pairs to ensure balanced performance and consistent operation across the flap width. Its robust construction supports reliable functionality in both residential and commercial environments.

Finished in **Nickel with brown cover caps**, the unit offers a clean, professional appearance while protecting internal components. Designed for straightforward installation, it integrates into cabinet sides while maintaining a neat internal finish.

Product Features

- **Heavy-duty lift assist damper for flap doors**
- **95° opening angle** for practical access
- Integrated **soft-close damping mechanism**

- Torque rating: **25–35 N·m per unit**
- Suitable for **counter flap and downward-opening doors**
- Durable **Nickel finish with brown cover caps**

Product Benefits

- Provides **controlled lifting and safe flap operation**
- Ensures **smooth and quiet closing performance**
- Reduces **impact and wear on cabinet components**
- Supports **heavier flap panels with stable movement**
- Enhances **user safety by preventing sudden drops**
- Suitable for **frequent-use cabinetry applications**

Technical Characteristics

- Opening angle: **up to 95°**
- Torque range: **25–35 N·m per unit**
- Typically installed as a **pair for balanced operation**
- Designed for **side panel mounting**
- Suitable for **medium to heavy flap weights**
- Engineered for **durable and consistent performance**

Applications

This lift assist damper is used in **kitchen units, storage cabinets, office furniture and fitted joinery** where **counter flaps or downward-opening doors** are required. It is particularly suited to applications where controlled movement and soft closing are essential, such as **appliance**
