Heavy Duty Magnetic -Tipped Push Latch for Large Doors - White

Variant code: ATL01200WT

Designed for use on large doors due to its strong push force, the body of this push latch is made of metal for high durability and the magnet has an allowance of 1.5° on each side to catch the strike plate correctly, helping the magnet to adjust even if there is a slight misalignment.

The plastic surround of the latch is flame resistant and compliant with the UL94V-0 standard.

The screws for the mounting plate are designed to be hidden from view making it deal for concealed doors and walk-in wardrobes.

Installation:

- Body must be installed at the height where people naturally push the door.
- Please use hinges which do not have catch functions.
- For overlay doors, please make sure there is correct clearance between the door and side board.
- Maximum door size:
    - Height - 2440mm
    - Width - 915mm
    - Weight - 125kg

The magnetic force may vary. Please confirm with actual products before use.
