Heavy Duty Tubular Latch 8mm Follower - Satin Stainless Steel - 64mm

Variant code: 2415.45.71.SSS

The **Heavy Duty Tubular Latch with 8mm Follower** is a premium architectural latch designed to provide smooth, reliable door operation in demanding commercial and residential environments. Manufactured with a durable **Satin Stainless Steel (SSS)** forend, this heavy-duty tubular latch is ideal for use with lever handles and door knobs, delivering dependable performance, long service life and a professional finish. Engineered for frequent use, it is suitable for a wide range of internal timber doors.

Designed to meet the requirements of modern architectural hardware, the latch features an **8mm follower** for compatibility with standard lever handles and incorporates a **guided latch bolt** for smooth engagement and quiet operation. The **adjustable strike plate** allows accurate alignment during installation, while the latch is suitable for **bolt-through fixing**, providing a stronger and more secure installation. Independently tested to **BS EN 1634-1**, it is suitable for use on fire-rated door assemblies when installed in accordance with the relevant certification.

Available in a range of backset sizes, the Heavy Duty Tubular Latch offers excellent installation flexibility, making it an ideal choice for commercial fit-outs, public buildings and high-quality residential projects where durability and reliability are essential.

Product Features

- Heavy duty tubular latch
- 8mm follower for standard lever handles and door knobs
- Satin Stainless Steel (SSS) forend finish
- Tested to BS EN 1634-1
- Guided latch bolt for smooth operation
- Adjustable strike plate
- Suitable for bolt-through fixing
- Designed for commercial and residential use

Product Benefits
