

Intaswitch Vision Panel, 804 x 254mm, FD30, 10 x 10mm Glass 1 Side Operation

Variant code: VIS-13-10-10

INTASwitch is a switchable vision panel, allowing discreet visibility into/out of a room at the push of a button. In its frosted, unpowered state the panel acts as an opaque blind, giving the room complete privacy.

While the button is pressed, the film becomes clear, allowing the room to be checked without needing to open the door or disturb occupants. Standard sizes are available, or for bespoke projects Switchable Vision Panels can be cut to your precise requirements.

For the mains power option Intastop's Electrical Transfer Hinge provides a concealed and vandal resistant method of transferring cable. This ensures all cabling for the INTASwitch to the door is concealed.

Features

- Mains power or battery operated (Battery is normally in closed state).
- Hidden wiring for mains power version via electrical transfer hinge switching <1 second.
- Available in any size and numerous creative shapes.
- Various operating mechanisms including remote control.
- Can be linked to data recording devices.

Benefits

- Security and dignity of staff and service users assured using a silent operation.
- Monitor patients easier with increased visibility.
- Size and shape tailor made to clients desire.
