

LED Spot Display Light Warm White – Black

Variant code: LDS18040BKWW

High Power White LED Designed for display applications, such as display cases, display cabinets or shop windows etc. The main advantage of this fitting is the way it rotates and tilts, so the light can be directly focused onto objects or areas exactly where it is required. Each fitting contains a High Power diode, which provides high light output, reduces the need for replacement of the fitting and produces no heat. The central part of the fitting has a 50 degree tilt angle, and will rotate 360 degrees. Running at only 1.25W per fitting, by moving from conventional halogen lighting to the High Power LED range you can save up to 80% power and see considerable savings on electricity bills. Available in both Warm White (WW) and Cool White (CW) Light
