Blum Legrabox Connector Brackets - 'M' (90.5mm) Height - Inner Drawer Front - Orion Grey

Variant code: ZI7.0MS0SOG

Blum LEGRABOX Connector Brackets - Inner Drawer Front Fixing - Orion Grey are designed to securely connect inner drawer fronts within the LEGRABOX drawer system. Engineered to Blum's precision standards, these brackets ensure accurate positioning and stable fixing of internal drawer fronts, supporting consistent alignment and reliable operation across a range of cabinetry applications.

Configured for **M height (90.5mm)** inner drawer applications, the brackets provide a secure interface between the drawer front and the LEGRABOX drawer assembly. They are designed to integrate seamlessly with LEGRABOX drawer sides, runners and internal components, ensuring that the inner drawer front remains firmly positioned during repeated use.

Manufactured from durable materials and finished in **Orion Grey**, these connector brackets maintain a consistent internal appearance while delivering long-term performance. As part of the LEGRABOX system, they support the creation of internal drawer configurations that enhance storage flexibility while maintaining a clean external cabinet aesthetic.

Product Features

- Designed for **Blum LEGRABOX drawer systems**
- Suitable for **inner drawer front fixing**
- **M height configuration** for internal drawers
- Provides secure and stable front connection
- Durable **Orion Grey finish**
- Precision-engineered for accurate alignment

Product Benefits

- Ensures secure fixing of inner drawer fronts
- Maintains consistent drawer alignment

Tel: 01626 333900

and operation
- Supports internal drawer configurations for improved storage
- Enhances overall drawer system stability
- Maintains a clean and uniform internal appearance
- Integrates seamlessly within LEGRABOX systems

Technical Characteristics

- Designed for use with **Blum LEGRABOX drawer components**
- Compatible with inner drawer front configurations
- Requires correct pairing with drawer sides and runners
- Precision-manufactured for consistent fitment
- Durable construction for long-term performance
- Finished in Orion Grey to match LEGRABOX interiors

Applications

These connector brackets are suitable for kitchen, bedroom and fitted furniture applications where internal drawers are required behind outer cabinet fronts. Commonly used in concealed storage solutions such as inner drawers within pan drawers or tall units, they provide a secure and reliable fixing method while maintaining the clean, handle-less aesthetic associated with modern LEGRABOX drawer systems.
