Blum Legrabox Cross Gallery Rail - for Inner Pull Out - Orion Grey

Variant code: ZR7.1080UOG

Blum LEGRABOX Cross Gallery Rail - Inner Pull-Out is designed to provide additional upper support and containment for inner pull-out drawer configurations within the LEGRABOX system. Engineered as part of Blum's premium drawer platform, it enhances drawer functionality by helping to secure contents while maintaining a **clean, minimalist appearance**.

Used in inner drawer applications, the cross gallery rail acts as a stabilising element positioned above the drawer sides, supporting **improved load containment** and **enhanced structural integrity**. It is particularly suited to taller drawer configurations where additional lateral support is required to prevent items from shifting during operation.

Designed to integrate seamlessly with LEGRABOX drawer sides and gallery components, the rail contributes to **stable and consistent drawer performance**. It supports precise installation and alignment, ensuring that the drawer system maintains uniform spacing and a refined visual finish. Available in multiple **nominal lengths**, it can be specified to match drawer width and cabinet dimensions.

Product Features

- Designed for **Blum LEGRABOX drawer systems**
- Suitable for **inner pull-out drawer configurations**
- Provides **additional upper containment support**
- Enhances **drawer stability and load control**
- Integrates with LEGRABOX gallery system components

Product Benefits

- Improves **organisation and containment of drawer contents**
- Supports **stable and controlled drawer operation**

SWS HARDWARE

- Enhances **functionality of inner drawer systems**
- Maintains **clean, minimalist drawer design**
- Allows consistent alignment across drawer configurations
- Suitable for **residential and commercial cabinetry**

Technical Characteristics

- Requires pairing with **LEGRABOX drawer sides and gallery components**
- Designed for inner pull-out drawer applications
- Nominal length must match drawer width
- Supports accurate installation and alignment
- Engineered for durability and long-term performance
- Ensures optimal integration within the LEGRABOX system

Applications

This cross gallery rail is suitable for **kitchen cabinetry, storage units and fitted furniture** where inner pull-out drawers are used. It is particularly effective in applications requiring **additional containment and organisation**, such as pantry drawers and internal storage systems. Available in multiple **nominal lengths**, it allows precise specification across different cabinet sizes while maintaining consistent LEGRABOX system performance.

Property	Value
Finish	Orion Grey
Material	Aluminum alloy
Cabinet Profile Width (mm)	1200
Length	1080mm
