Lever Action Flush Bolt - 200 x 20mm - Satin Stainless Steel - Radius

Variant code: 3425.02R.SSS

The **Lever Action Flush Bolt** is a premium concealed door bolt designed to provide secure and reliable locking for the inactive leaf of timber double doors. Manufactured in a durable **Satin Stainless Steel (SSS)** finish, this heavy-duty flush bolt measures **200 x 20mm** and features a smooth lever action for quick, effortless operation. Ideal for commercial and residential installations, it offers dependable security while maintaining a clean, architectural appearance.

Designed for ease of installation and long-term performance, the flush bolt incorporates an **11mm diameter bolt** with a **15mm adjustable bolt throw**, allowing precise alignment during fitting for secure engagement with the floor or frame. Available in both **radiused** and **square** faceplate profiles, it can be matched to a variety of door hardware styles. For fire-rated door applications, **intumescent kits are available** to help maintain fire door performance when required.

Constructed from corrosion-resistant materials, the Lever Action Flush Bolt is suitable for high-traffic commercial environments where durability, reliability and a professional finish are essential. Its concealed installation preserves the clean lines of modern door sets while providing secure locking for inactive door leaves.

Product Features
