

Lamp Lift-Assist Damper for Counter Flaps - Soft Close -10.5 - 13.5 N·m/pc - Includes Stopper

Variant code: CFDMS

Smooth, Controlled Flap Motion with Adjustable Lift-Assist Dampers

Elevate the functionality and safety of your counter flaps with our premium Lift-Assist Damper and Stopper system! Designed for commercial and hospitality environments, this innovative hardware is the ideal solution for high-traffic areas like bars, restaurants, and reception counters.

Key Features & Benefits

- Soft & Silent Closing: Experience a smooth and soft-close movement as the flap nears its closing radius. This prevents loud, damaging slamming, enhancing both the lifespan of your counters and the professionalism of your space. The reliable damper function provides controlled movement even when the flap is only slightly open, ensuring constant safety and control.
- Adjustable Flap Opening: Choose the perfect level of assistance! Available in Light, Medium, and Heavy opening strengths, you can select the damper tailored to your specific flap weight and desired lifting feel.
- Integrated Safety Stopper: The built-in stopper reliably holds the flap at a secure 95° opening, preventing it from swinging open too far and offering easy access while maintaining stability.
- Versatile Compatibility: This damper is designed for a wide range of applications, accommodating a flap thickness of 15-40mm.
- Effortless Installation: Upgrade your existing infrastructure without the hassle! This clever design allows for easy attachment to already installed

counters without extra processing, making it a quick, convenient, and cost-effective solution.

Upgrade Your Counter Experience

Invest in quality hardware that delivers superior performance and durability. Our heavy-duty lift-assist damper is the perfect upgrade for any professional setting, offering enhanced safety, quiet operation, and seamless functionality.

Optimise your counters today for a safe, silent, and superior experience!
