Lock for Inset Swinging Glass Door, Non-Handed To Differ - Polished Chrome

Variant code: AGL02309.CP

Lock for Inset Swinging Glass Doors is a premium locking solution designed to provide secure access control for frameless glass display cabinets and showcases. Finished in an attractive **Polished Chrome**, this lock combines modern aesthetics with dependable security, making it ideal for retail displays, commercial interiors, museums and residential glass cabinetry.

Designed for **inset swinging glass doors**, the GS-GL5 features a **non-handed design**, allowing installation on either left or right-hand opening doors for maximum flexibility. Supplied **keyed to differ**, each lock operates with its own unique key, providing individual security for multiple cabinets. Its compact construction offers a neat, unobtrusive appearance while maintaining reliable locking performance for everyday use.

Manufactured to Sugatsune's renowned quality standards, the GS-GL5 delivers smooth operation, durable construction and a professional finish suitable for high-end architectural and furniture applications.
