

## Locking Shepherd's Crook Fastener – Left Hand – Beeswax

**Variant code: 33476**

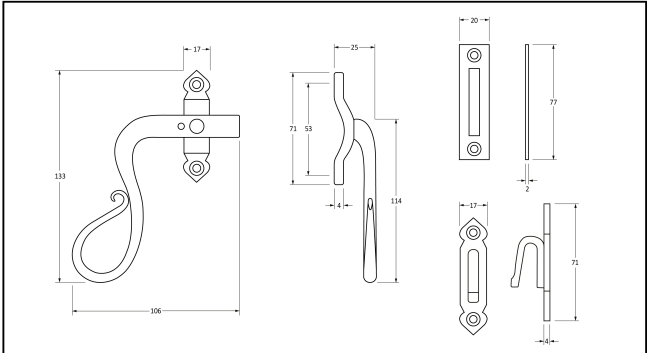

The shepherd's crook is a delicate and traditional design that is only achievable through the skills of our master blacksmiths.

Designed to fit casement windows and match the shepherd's crook window stays in the range.

- Our handmade fasteners are forged from mild steel giving them unrivalled strength and a wealth of character.
- The product is handed and therefore care needs to be taken when choosing the correct hand. From the inside view, if your window is hinged on the left then a left-hand fastener is required.
- Includes a mortice plate and hook plate for different fitting options.
- The fastener has a locking mechanism by way of a grub screw.
- Supplied with matching SS wood screws.

| Property            | Value            |
|---------------------|------------------|
| Finish              | Beeswax          |
| Range               | Shepherd's Crook |
| Overall Length (mm) | 133              |
| Handle Length (mm)  | 106              |

Gallery

Technical drawing of the Shepherd's Crook Fastener. The drawing includes a front view showing a hook with a 106mm width and 133mm height, and a side view showing a 25mm width and 114mm height. Detail views show the mounting plate with 20mm and 17mm dimensions, and the hook with 71mm and 58mm dimensions. The fastener is made of mild steel and includes a mortice plate, hook plate, and steel allen key.

Please Note, due to the hand crafted nature of our products all measurements are approximate and should be used as a guide only.
