

Closing Magnetic Plate for Door – SW126 Stainless Steel Effect

Variant code: KC50/G.SSE

The **TECTUS Closing Magnetic Plate for Glass Doors** is a dedicated component designed for use with a compatible **magnetic door closing system**. Specifically intended for **glass doors**, the plate works together with the corresponding closing magnet to help hold the door securely in its closed position without requiring a conventional mechanical latch.

Measuring **145 x 10mm**, the magnetic plate is positioned on the **glass door**, while the corresponding magnetic closing component is installed within the frame. This arrangement provides a discreet solution for contemporary glass door installations where a clean appearance and contactless magnetic closing action are required.

The magnetic closing arrangement is particularly suited to doors operated using a **door pull or knob rather than a conventional lever handle**, as the magnetic closing system is designed to retain the door rather than mechanically lock it. Available in different finish options, the plate can be coordinated with compatible door hardware and contemporary interior schemes.

Product Features

- **Magnetic closing plate specifically designed for glass doors**
- Designed for use with the corresponding **magnetic door closing system**
- Overall dimensions of **145 x 10mm**
- Installed directly onto the **glass door**
- Works with the closing magnet positioned within the **door frame**
- Provides a **contactless magnetic closing arrangement**
- Helps keep the door securely in its **closed position**
- Suitable for **right- and left-hand door applications**
- Suitable for contemporary **glass door installations**
- Available in different **architectural finish options**

Product Benefits

- **Purpose-designed for glass doors, providing a dedicated magnetic plate for compatible closing systems**
- **Magnetic retention helps keep the door closed without relying on a conventional mechanical latch**
- **Compact 145 x 10mm dimensions provide a discreet solution for contemporary glass door installations**
- **Works as part of a contactless magnetic closing system for smooth door retention**
- **Particularly suited to door designs using a pull handle or door knob rather than a conventional lever-operated latch**
- **Can be incorporated into modern glass door schemes where minimal visible hardware is preferred**
- **Different finish options allow coordination with compatible door and architectural hardware**

Technical Characteristics

- **Product Type:** Closing Magnetic Plate
- **Door Application:** Glass Doors
- **Overall Length:** 145mm
- **Overall Width:** 10mm
- **Handing:** Right & Left Hand
- **Operating Principle:** Magnetic Door Retention
- **Installation Position:** Glass Door
- **Compatible Closing Component Position:** Door Frame
- **Finish:** Stainless Steel Effect
- **Application Type:** Interior Glass Door Magnetic Closing System

Applications

The **TECTUS Closing Magnetic Plate for Glass Doors** is intended for contemporary interior glass door installations using a compatible **magnetic closing system**. The **145 x 10mm magnetic plate** is positioned on the glass door and works with the corresponding closing magnet installed within the frame to help retain the door in its closed position. It is particularly suitable for architectural glass doors operated with a **door pull or knob** where a clean, discreet magnetic closing arrangement is preferred over a conventional lever-operated latch.

Property	Value
Finish	Stainless Steel Effect
