

Magnetic Plate for Door – SW126 Stainless Steel Effect

Variant code: KC25/G.SSE

The **Magnetic Plate for Glass Doors** is a specialist door component designed to provide a neat and reliable magnetic closing point for compatible **glass door systems**. Suitable for glass with a thickness of **8–10mm**, the plate combines compact dimensions with a discreet **Stainless Steel Effect** appearance for contemporary interior door installations.

Measuring **90mm in length** with a **10mm diameter**, the magnetic plate is manufactured from **stainless steel** and features a matt surface. Its slim profile is particularly suited to modern glass door designs where minimal, unobtrusive architectural hardware is preferred.

Designed to work as part of a compatible **magnetic closing system**, the plate provides the corresponding magnetic interface required for controlled door closure. The linked variant is configured for **left-handed doors** and is intended for use with compatible magnetic closing components on suitable glass door installations.

Product Features

- Specialist **magnetic plate for glass doors**
- Suitable for glass thicknesses of **8–10mm**
- Designed for use as part of a compatible **magnetic door closing system**
- Manufactured from **stainless steel**
- Specified in a contemporary **Stainless Steel Effect**
- Features a **matt surface**
- Overall length of **90mm**
- Compact **10mm diameter**
- Linked product configuration is suitable for **left-handed doors**
- Slim design complements contemporary **glass door installations**
- Supplied as a **single magnetic plate**

Product Benefits

- Provides the magnetic interface required for compatible magnetic closing systems on glass doors
- Designed specifically for **8–10mm glass**,

providing dedicated compatibility with suitable glass door installations

- Slim 90 x 10mm dimensions provide a discreet appearance that complements minimalist glass door designs
- **Stainless steel construction** provides a robust solution for its intended door hardware application
- Matt **Stainless Steel Effect** provides a contemporary architectural appearance
- Designed for integration into a coordinated **magnetic glass door closing system**

Technical Characteristics

- **Product Type:** Magnetic Door Plate
- **Application:** Glass Doors
- **Material:** Stainless Steel
- **Finish:** Stainless Steel Effect
- **Surface:** Matt
- **Length:** 90mm
- **Diameter:** 10mm
- **Glass Thickness:** 8–10mm
- **Handing:** Left Hand – Linked Variant
- **System Type:** Magnetic Door Closing System

Applications

The **Magnetic Plate for Glass Doors** is designed for use with compatible **magnetic closing systems** on glass doors with a thickness of **8–10mm**. Its compact **90 x 10mm profile**, stainless steel construction and **Stainless Steel Effect** appearance make it particularly suitable for contemporary **residential, office and architectural glass door installations** where a discreet magnetic closing solution and minimalist hardware appearance are required.

Property	Value
Finish	Stainless Steel Effect
Length (mm)	90
Diameter (mm)	10
Glass Thickness (mm)	8–10
