

Magnetic Touch Latch – Long Stroke – Brown

Variant code: ML-120-BRN

Long Stroke Magnetic Touch Latch is a durable **push-to-open and push-to-close magnetic latch** designed to provide smooth, reliable operation for handle-free cabinet doors. Available in **Brown** and **White** finishes, it features a **long stroke mechanism** that offers greater operating travel, making it ideal for overlay cabinet doors and modern furniture where convenient access and a clean, minimalist appearance are required.

Unlike conventional spring-operated touch latches, this model incorporates a **rotary cam mechanism**, providing improved durability and a longer service life through repeated opening and closing cycles. A simple push on the cabinet door releases the latch for opening, while another gentle push securely closes and retains the door using magnetic force.

Designed for **overlay door applications**, a **3.5mm gap between the door and cabinet frame** should be maintained to ensure correct push operation. Available in two finishes to complement a wide variety of cabinetry styles, this latch offers dependable performance for both residential and commercial furniture.

Product Features

- Long stroke magnetic touch latch
- Available finishes:
 - Brown
 - White
- Push-to-open and push-to-close operation
- Rotary cam mechanism for extended service life
- Magnetic door retention
