

Mains Dimmable DC Driver 12V, 10W inc 6-Way Premium Input

Variant code: LMD12010

Mains dimmable LED driver, for 12v dimmable LEDs.

If you have dimmable 12v LED fittings they can be controlled with this dimmable driver. This means that you can use a regular sized mains wall dimmer switch to dim the LEDs.

This driver has a maximum load of 10w, and must be run at at least 5% load. It is compatible with leading Edge Triac dimmer trailing edge dimmers.

Constant voltage, universal AC input: 180-240VAC

This driver is supplied with a TOP6 plug and play connector. If you have any questions regarding compatibility with connectors, please contact us for assistance.
