

Blum Metabox 'N' Height Drawer Front Connector – Left Hand

Variant code: ZSF.1510LH

Blum METABOX Drawer Front Connector – N Height is a precision-engineered fixing component designed to securely connect drawer fronts to Blum METABOX drawer sides. Manufactured by **Blum**, this connector ensures reliable attachment, consistent alignment and long-term performance within METABOX drawer systems.

Specifically developed for **N height drawer configurations**, the connector plays a critical role in maintaining drawer stability and front positioning during operation. It enables accurate installation of drawer fronts while supporting smooth drawer movement and uniform gap alignment across cabinetry.

As part of the METABOX system, this connector integrates seamlessly with compatible drawer components, ensuring straightforward installation and dependable functionality. Designed for use across a range of **nominal drawer lengths**, it offers flexibility for different cabinet depths without compromising performance.

Product Features

- Designed for **METABOX N height drawer systems**
- Secure **drawer front fixing connector**
- Ensures **accurate alignment and positioning**
- Compatible with **Blum METABOX components**
- Suitable for **various nominal drawer lengths**
- Durable construction for long-term use

Product Benefits

- Provides **secure and stable drawer front**

attachment

- Enables **precise alignment and consistent reveals**
- Supports **smooth and reliable drawer operation**
- Simplifies **installation within METABOX systems**
- Ensures **compatibility across multiple drawer sizes**
- Suitable for **residential and commercial cabinetry**

Technical Characteristics

- Designed for **Blum METABOX N height drawers**
- Compatible with **various nominal drawer lengths**
- Engineered for **accurate front positioning**
- Supports **stable drawer operation under load**
- Integrates with standard **METABOX drawer assemblies**
- Suitable for **system-based cabinet construction**

Applications

This drawer front connector is used in **kitchen cabinetry, office furniture, storage units and fitted joinery** where METABOX drawer systems are specified. It ensures secure attachment and precise alignment of drawer fronts, making it essential for achieving a **clean, professional finish** and consistent performance across a wide range of cabinet sizes and nominal lengths.
