Blum Metabox Drawer Front Connector - Left Hand

Variant code: ZSF.1700LH

Blum METABOX Drawer Front Connector is designed to securely fix drawer fronts to METABOX drawer systems, ensuring **accurate alignment** and **long-term stability** in cabinet applications. As part of Blum's proven drawer system platform, this component supports **efficient assembly** while maintaining **consistent drawer front positioning** across a wide range of furniture designs.

Engineered specifically for compatibility with the METABOX system, the connector provides a reliable interface between the drawer front and metal drawer sides. Its design enables **precise positioning** and **secure fixing**, helping achieve **clean, uniform drawer lines** across multiple units. This supports both aesthetic consistency and functional reliability in kitchens, bedrooms and fitted furniture.

The connector is suited to both workshop production and on-site installation, allowing for **efficient assembly processes** while reducing the need for extensive adjustment during fitting. Manufactured for durability, it integrates seamlessly within the METABOX system and supports **dependable long-term performance**.

Product Features

- Designed for **Blum METABOX drawer systems**
- Provides **secure fixing of drawer fronts**
- Enables **accurate and consistent alignment**
- Supports **uniform drawer front positioning**
- Allows **efficient installation and assembly**
- Durable construction for **long-term reliability**

Product Benefits

- Maintains **clean and consistent drawer lines**
- Improves **installation accuracy and speed**
- Provides **stable drawer front**

attachment
- Reduces need for on-site adjustment
- Enhances **overall cabinet finish quality**
- Suitable for **high-use residential and commercial furniture**

Technical Characteristics

- Compatible with **Blum METABOX drawer systems**
- Designed for integration with **metal drawer sides**
- Supports **accurate front positioning and fixing**
- Suitable for **standard cabinet drawer constructions**
- Enables **efficient workshop and on-site assembly**
- Part of the Blum **drawer system component range**

Applications

This drawer front connector is used in kitchen, bedroom and fitted furniture installations utilising Blum METABOX drawer systems. It is particularly suited to applications requiring **consistent drawer alignment**, such as multi-drawer cabinets, storage units and modular furniture where both **visual uniformity and reliable performance** are essential.
