

MODEEZ Connector, Non-locking – Steel – Black – 57mm x 12.7mm – Pack of 300

Variant code: 5063BK

MODEEZ Non-Locking Steel Connector is a heavy-duty concealed connector designed for fast, reliable assembly of furniture, cabinetry and interior joinery. Measuring **57mm x 12.7mm** and supplied in a **pack of 300**, these high-strength steel connectors provide a durable fixing solution that is highly resistant to distortion and warping, making them ideal for high-volume manufacturing and commercial installations.

Designed for use with the **MODEEZ shoulder screw (sold separately)**, the connector allows components to be quickly attached and detached without compromising strength. The non-locking design provides efficient assembly and disassembly where regular maintenance or furniture reconfiguration may be required. Manufactured from robust steel with a durable **black finish**, the connector offers excellent long-term performance while remaining discreet once installed.

Suitable for cabinet doors and furniture with a **minimum door thickness of 19mm**, the Sugatsune MODEEZ Connector is engineered to simplify production while maintaining a secure and dependable connection. Its precision construction makes it an ideal choice for professional furniture manufacturers, cabinet makers and commercial fit-out specialists.

Product Features

- MODEEZ non-locking concealed connector
- 57mm x 12.7mm size
- Manufactured from heavy-duty steel
- Durable black finish
- Highly resistant to distortion and warping
- Quick attachment and removal using compatible MODEEZ shoulder screw (sold separately)
- Suitable for minimum 19mm door thickness
