

Multi-Angle Lid Stay with Lock

Variant code: L-FS350A

Multi-Angle Lid Stay with Lock is a versatile support stay designed to hold upward-opening lids and flaps securely at multiple positions. Featuring an integrated locking lever, the stay allows users to lock the lid at virtually any desired opening angle, providing safe, convenient access while preventing unexpected movement during use.

The innovative locking mechanism secures the stay in both the **extension and compression directions**, giving excellent stability whether the lid is being opened or closed. Releasing or repositioning the lid is simple—just slide the lock lever to disengage or re-engage the mechanism. Designed with the same **installation pitch as the Sugatsune LB-350A Lid Stay**, it offers a straightforward replacement or upgrade without requiring additional drilling.

Manufactured from durable metal and engineering-grade plastic components, the stay is designed for long-term reliability. At the end of its service life, the **plastic and metal components can be separated**, supporting easier recycling and environmentally responsible disposal.

Product Features

- Multi-angle lid stay with integrated locking lever
- Locks the lid securely at multiple opening positions
- Locking mechanism secures both extension and compression directions
- Simple slide lever operation
- Installation pitch identical to **Sugatsune LB-350A**
- Durable metal and engineering plastic construction
- Plastic and metal components can be separated for recycling
- Suitable for upward-opening lids and flaps

Product Benefits

- Allows the lid to be held securely at the desired opening angle

- Improves user safety by preventing accidental lid movement
- Flexible positioning for greater convenience during use
- Direct replacement for LB-350A mounting pattern
- Durable construction provides reliable long-term performance
- Supports environmentally responsible end-of-life disposal

Technical Characteristics

- **Product Type:** Locking Lid Stay
- **Brand:** Sugatsune
- **Operation:** Multi-Angle Locking
- **Locking Method:** Sliding Lock Lever
- **Movement Control:** Locks in Extension and Compression Directions
- **Installation Pitch:** Compatible with LB-350A
- **Construction:** Metal and Engineering Plastic
- **Recycling:** Plastic and Metal Components Separable
- **Application:** Upward-Opening Lids and Flaps

Applications

Multi-Angle Lid Stay with Lock is ideal for **storage chests, overhead cabinets, access panels, toolboxes, furniture, marine cabinetry, motorhomes, caravans, office furniture and bespoke joinery**. Designed for upward-opening lids and flap doors, it provides secure multi-position support and controlled operation, making it suitable for residential, commercial, industrial and marine environments where safe and adjustable lid positioning is required.

Property	Value
Finish	Satin
Width (mm)	32.25
Length (mm)	56
Opening angle (°)	90
Load Capacity (kg)	30
Height (mm)	374
Material	304 Stainless Steel
